Extension of Comment Period

In the August 4, 2006 NODA, EPA provided notice that it had placed in the CAIR FIP docket allocation tables for EGU NO_x annual and EGU NO_x ozone season allocations for control periods 2009–2014. The allocation tables also included inventories of heat input and inventories of potentially exempt units. In addition, EPA also submitted a TSD describing the allocation table data fields to the docket.

The EPA originally provided a 30-day period for the unit owners, unit operators, and the public to submit objections regarding individual units' treatment as potentially covered or not covered by CAIR and, for units treated as potential CAIR units, the data used in the allocation calculations and the allocations resulting from such calculations. In response to requests from the American Forest and Paper Association, EPA is extending the comment period for an additional 30 days. Please refer to the August 4, 2006 notice for a complete description of the data on which EPA is soliciting comment.

Dated: September 5, 2006.

Director, Office of Air and Radiation.
