SUPPLEMENTARY INFORMATION: The "Conservation Programs Manual: Part 513-RC&D Program" is a document used by NRCS and other USDA staff members, RC&D Council members, and others that either develop RC&D applications or participate in the RC&D Program. The purpose of this document is to provide policy guidance for the RC&D Program, not to establish regulatory requirements. The RC&D Program was authorized to encourage and improve the capability of State and local units of government and local nonprofit organizations in rural areas to plan, develop, and implement programs for resource conservation and development. Through the establishment of RC&D areas, the program establishes or improves coordination systems in communities and builds community leadership skills to effectively use Federal, State, and local programs for the communities' benefit. Current program objectives focus on improvements achieved through natural resources conservation and community development. Such activities lead to sustainable communities, prudent land use, and the sound management and conservation of natural resources.

Assistance is provided, as authorized by the Secretary of Agriculture, to

designated RC&D areas through their organized RC&D Councils (comprised of local affected officials and civic leaders). RC&D Councils, in association with local, State, and Federal governments and other non-profit organizations, initiate and lead the planning and implementation of their locally developed RC&D area plans. Councils also obtain assistance from other local, State, and Federal agencies, private organizations, and foundations.

(Not all prohibited bases apply to all programs.)
