

border through growth of both numbers of employees and physical capacity at the nation's land, air, and sea ports of entry; (3) implementing changes to the immigration and border management processes through technological enhancements that would allow eligibility and risk assessments to be made primarily overseas; and/or (4) a combination of approaches 2 and 3. Due to the national scope of this Draft PEA, the environmental impacts of implementing any of these approaches could occur within virtually every ecosystem in the United States. The Draft PEA is a qualitative assessment that provides information on the potential for significant environmental impacts from each of these four strategies that will be used to inform further policy and strategy development and future implementation of the proposed changes. This analysis provides results that will be used to focus any future environmental impact analyses on the most important resources of concern. The Draft PEA found that the resource areas most likely to be impacted by these changes are air quality and socioeconomics. The Draft PEA is being issued and made available to the public in accordance with the provisions of the Council on Environmental Quality (CEQ) regulations for implementing the National Environmental Policy Act of 1969 (NEPA). This Notice also announces that US-VISIT will conduct public meetings in February and March 2006 at seven locations in the United States, at which US-VISIT will invite the public to comment on information and analyses in the Draft PEA. The Draft PEA is available in English and Spanish. US-VISIT has made the Draft PEA widely available by distributing it (or a notice of its availability) to many interested parties, local and national newspapers, local libraries, and by posting it on the Internet. US-VISIT intends to issue subsequent Notices.

The dates and locations of all public meetings will be publicized no less than one week in advance in local news media in communities where the meetings will be held.
