II. Petition for Tolerance and Proposed Rule

The Interregional Research Project Number 4 (IR-4) submitted a petition (PP# 0E6107) for a tolerance for the pesticide diphenylamine under section 408 of the FFDCA, 21 U.S.C. 346a. Specifically, the petition requested that 40 CFR 180.190 be amended by establishing a tolerance for residues of the plant growth regulator diphenylamine, in or on pear (post harvest) at 5.0 parts per million (ppm). However, neither IR-4 nor Atomchem North American Incorporated, the registrant, submitted all required elements of a petition in support of establishing a tolerance. Because the petition was incomplete, EPA did not publish a Notice of Filing for the petition. Instead, in the **Federal Register** of December 6, 2006 (71 FR 70703) (FRL-8104-1), EPA issued a proposed rule pursuant to section 408(e) of

FFDCA, 21 U.S.C. 346a(e). The proposed rule included EPA's explanation of why the proposed diphenylamine tolerance regulation met the safety standard.

The Northwest Horticulture Council submitted two comments in favor of the establishment of diphenylamine on pear.

There was also a comment submitted by a private citizen who opposed the authorization to sell to any pesticide that leaves a residue on food. The Agency has previously responded to this commenter's claims regarding the validity of use animal testing to determine a pesticide's potential toxicity. Refer to **Federal Register** of (70 FR 1349, January 7, 2005). This commenter also claimed the Agency was "negligent" for only conducting 90-day testing on rats. The commenter is mistaken, however, because EPA examined other rat studies involving lifetime exposure and multiple generations of rats. (71 FR 70703) (FRL-7691-4), December 6, 2006).

The final comment opposed the proposed regulation simply on the grounds that there are "too many bugs" and too many pesticide regulations. This comment supplied no rationale or supporting information and thus no response is warranted.

III. Action on Tolerance Petition and Proposed Regulation

Based on the rationale and findings set forth in the proposed rule, a tolerance is established for the residues of diphenylamine in or on pear at 5.0 ppm.

IV. Statutory and Executive Order Reviews

This final rule establishes a tolerance under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, nor does it require any special

considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994).

Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency hereby certifies that this proposed action will not have significant negative economic impact on a substantial number of small entities. Establishing a pesticide tolerance or an exemption from the requirement of a pesticide tolerance is, in effect, the removal of a regulatory restriction on pesticide residues in food and thus such an action will not have any negative economic impact on any entities, including small entities.

This rule directly regulates growers, food processors, food handlers and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000) do not apply to this rule. In addition, This rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note).

V. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S.

Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a "major rule" as defined by 5 U.S.C. 804(2).
