Description: Under Section 313 of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 873, any explosives used in underground coal mines must be permissible. The Mine Act also provides that under safeguards prescribed by the Secretary of Labor, a mine operator may permit the firing of more than 20 shots and the use of non-permissible explosives in sinking shafts and slopes from the surface in rock. Title 30 CFR 75.1321 outlines the procedures by which a permit may be issued for the firing of more than 20 boreholes and/or the use of non-permissible shot-firing units in underground coal mines. In those instances in which there is a misfire of explosives, 30 CFR 75.1327 requires that a qualified person post each accessible entrance to the affected area with a warning to prohibit entry. Title 30 CFR 77.1909-1 outlines the procedures by which a coal mine operator may apply for a permit to use non-permissible explosives and/or shot-firing units in the blasting of rock while sinking shafts or slopes for underground coal mines.

To obtain a permit, the mine operator files an application with the MSHA district manager in the district in which the mine is located. Applications may be mailed or faxed, using company letterhead stationery and should contain the name and address of the mine, the designated active workings in which the units will be used and the approximate number of shots to be fired, the period of time during which such units are to be used, the nature of the development or construction for which they will be used, a plan to protect miners, a statement of the specific hazards anticipated, and the method to be employed to avoid the dangers anticipated.

The district manager may permit the firing of more than 20 boreholes of permissible explosives in a round where he has determined that it is necessary to
