

and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a proposed continuing information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the certification of flood proof residential basements in Special Flood Hazard Areas.

**SUPPLEMENTARY INFORMATION:** The National Flood Insurance Program (NFIP), administered by the Federal Emergency Management Agency (FEMA), regulation 44 CFR 60.3, Floodplain Management Criteria for Flood-Prone Areas, ensures that buildings in communities participating in the NFIP, in Special Flood Hazard Areas (SFHAs), have their lowest floor elevations including basement at or above the Base Flood Elevation (the 100-year flood elevation). This requirement reduces the risks of flood hazards to new buildings in SFHAs and reduces insurance rates. However, FEMA

regulation 44 CFR 60.6(c) allows communities to apply for an exception to permit and certify the construction of floodproofed residential basements in SFHAs. The certification must ensure that the community has demonstrated that that areas of special flood hazard, in which residential basements will be permitted, are subject to shallow and low velocity flooding and that there is adequate flood warning time to notify residents of impending flood. This certification allows the community to ensure that local floodplain management ordinances are met and allows property owners to receive a "discounted" flood insurance rate applicable to residential buildings with floodproofed basements.
