Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236, as detailed below.

[Docket Number FRA-2007-28699]

Applicant: Canadian National-Illinois Central Railroad, Mr. Mark Ryon, Manager, Signals & Communication, 102 Commerce Park Drive, Jackson, Mississippi 39217.

The Canadian National-Illinois Central Railroad (CN) seeks approval of the proposed discontinuance and removal of the automatic block signal (ABS) system on the Central Division, Memphis Subdivision (Milepost 394.7 to 397.5), and on the Grenada Subdivision (Milepost 397.5 to 398.2) in and around Memphis, Tennessee.

The reason given for the proposed changes is that the ABS is no longer necessary. The signal system is now located wholly within the Memphis Terminal Yard Limits, where all movement must be coordinated with the person in charge of the yard at Memphis, Tennessee.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

All communications concerning this proceeding should be identified by Docket Number FRA-2007-28699 and may be submitted by one of the following methods:

- *Web site:* <http://dms.dot.gov>.

Follow the instructions for submitting comments on the DOT electronic site;

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR Part 236, as detailed below.

[Docket Number FRA-2007-28575]

Applicant: CSX Transportation, Incorporated, Mr. C.M. King, Chief

Engineer, Communications and Signals, 500 Water Street, SC J-350, Jacksonville, Florida 32202.

CSX Transportation, Incorporated (CSX) seeks approval of the proposed modification of an interlocking, discontinuance and removal of traffic control system signals, and the conversion of power-operated switches to hand-throw operation, from Gladstone (Milepost CAB-119.2) to Clifton Forge, Virginia (Milepost CAB-229.4), on the Huntington Division, James River Subdivision. The #168L Signal on #1 Main Track will be discontinued and removed. The interlocking at Lynchburg (Milepost CAB-146.1) was originally configured of two tracks crossing one track at-grade and two turnouts; the crossings at-grade, along with the turnout off of #2 Main Track have been removed. The #165 power-operated switch off #1 Main Track will be converted to hand-throw operation, and the governing signals will be discontinued and removed. The #116L and #116R controlled signals at major Milepost CAB-167.3 will be discontinued and removed. The #109 power-operated switch off of #1 Main Track at Balcony Falls (Milepost CAB-175.0) will be converted to hand-throw operation, and the governing signals will be discontinued and removed. The #107 power-operated switch off of #1 Main Track at K Cabin (Milepost CAB-175.3) will be converted to hand-throw operation and the governing signals will be discontinued and removed. The #68R and #66L controlled signals at WAS Springwood (Milepost CAB-198.9) will be discontinued and removed. The #58L and #58R controlled signals at Lyle (Milepost CAB-202.3) will be discontinued and removed. The electric lock switch off of single main track at Milepost CAB-212.93 will be converted to a no clear location and the electric lock mechanism will be removed.

Pole line elimination and the installation of a microprocessor-based signal system are the reasons given for the proposed changes. Furthermore, CSX contends that present-day operations do not warrant retaining the power-operated switches and controlled signals.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral

hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR Part 236, as detailed below.

[Docket Number FRA-2007-28574]

Applicant: Union Pacific Railroad, Mr. Thomas T. Ogee, AVP Engineering Design, 1400 Douglas Street, Stop 0910, Omaha, Nebraska 68179.

The Union Pacific Railroad Company (UP) seeks approval of the proposed discontinuance and removal of the rail locks on the Mississippi River moveable bridge, located near Clinton, Iowa, on the UP Geneva Subdivision at Milepost 136.7. The installation of new self-aligning lift rails with solid operating linkage will eliminate the need for the rail locks.

The reason given for the proposed changes is that the remaining appliances on the bridge will provide required protection.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.
