BILLING CODE 3410-02-P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 2 and 171

RIN 3150-A115

NRC Size Standards; Revision

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend the size standards it uses to qualify an NRC licensee as a small entity under the Regulatory Flexibility Act and making the same change to its annual fee rule. NRC proposes to increase the receipts-based small business size standard from \$5 million to \$6.5 million to conform to the standard set by the Small Business Administration (SBA). This size standard reflects the most commonly used SBA size standard for the nonmanufacturing industries. SBA adjusted this standard on January 23, 2002 (67 FR 3041) and on December 6, 2005 (70 FR 72577) to account for inflation.

DATES: The direct final rule will become effective on October 24, 2007, unless significant adverse comments on the amendment are received by September 10, 2007. If the rule is withdrawn as a result of such comments, timely notice of the withdrawal will be published in the **Federal Register**. Comments received after September 10, 2007 will be considered if it is practical to do so, but the NRC is able to ensure only that comments received on or before this date will be considered.

ADDRESSES: You may submit comments by any one of the following methods. Please include the following number (RIN 3150-A115) in the subject line of your comments. Comments on rulemakings submitted in writing or in electronic form will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including

personal information such as social security numbers and birth dates in your submission.

SUPPLEMENTARY INFORMATION: For additional information see the direct final rule published in the Rules and Regulations section of this **Federal Register**.

Procedural Background

This rulemaking has the simple aim of updating NRC's size standards to reflect those of the SBA. Because the NRC

believes that this action should not cause controversy, the NRC is using the direct final rule process for this rule. The amendment in this rule will become effective on October 24, 2007. However, if the NRC receives significant adverse comments on this direct final rule by September 10, 2007, the NRC will publish a document that withdraws this action. In that event, the comments received in response to these amendments would then be considered as comments on the companion proposed rule published elsewhere in this **Federal Register**, and the comments will be addressed in a later final rule based on that proposed rule. Unless the modifications to the proposed rule are significant enough to require that it be republished as a proposed rule, the NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the staff to make a change (other than editorial) to the rule.

SUPPLEMENTARY INFORMATION: The Energy Policy and Conservation Act (EPCA) of 1975 (42 U.S.C. 6291-6309) established an energy conservation program for major household appliances. The National Energy Conservation Policy Act of 1978 (NECPA) amended EPCA to add Part C of Title III (42 U.S.C. 6311-6317), which established an energy conservation program for certain industrial equipment. The Energy Policy Act of 1992 (EPACT), Public Law 102-486, also amended EPCA, and included amendments that expanded Title III to include certain types of commercial equipment, including small electric motors. Specifically, EPACT amended section 346 of EPCA (42 U.S.C. 6317) to provide that the Secretary of Energy prescribe testing requirements and energy conservation standards for those small electric motors for which the Secretary determines that standards “would be technologically feasible and economically justified, and would result in significant energy savings.” (42 U.S.C. 6317(b)(1))

On July 10, 2006, the Secretary of Energy made a positive determination with respect to testing requirements and energy conservation standards for small electric motors. 71 FR 38799. As a result of DOE’s determination analysis, the Secretary determined preliminarily that standards for small electric motors would be “technologically feasible and economically justified, and would result in significant energy savings.” DOE will determine whether and at what level to promulgate energy conservation standards for small electric motors based on in-depth consideration, with public participation, of the technical feasibility, economic justification, and energy savings of potential standards levels in the context of prescribing new or amended standards pursuant to section 325(o) and (p) of EPCA (42 U.S.C. 6295(o), (p)).

To begin the required rulemaking process, the Department prepared a Framework Document to present the issues and explain the analyses and process it anticipates using to set energy conservation standards for small electric motors. The focus of the public meeting will be to discuss the analyses and issues identified in various sections of the Framework Document. During the Department’s presentation to
