#### IV. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the Administrator may approve such a request.

#### V. Procedures for Withdrawal of Request and Considerations for Reregistration of Methyl Parathion

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before December 7, 2007. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

#### VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action.

If the request for voluntary cancellation and/or use termination is granted as discussed above, the Agency intends to issue a cancellation order that will allow persons other than the registrant to continue to sell and/or use existing stocks of cancelled products until such stocks are exhausted, provided that such use is consistent

with the terms of the previously approved labeling on, or that accompanied, the cancelled product. The order will specifically prohibit any use of existing stocks that is not consistent with such previously approved labeling. If, as the Agency currently intends, the final cancellation order contains the existing stocks provision just described, the order will be sent only to the affected registrants of the cancelled products. If the Agency determines that the final cancellation order should contain existing stocks provisions different than the ones just described, the Agency will publish the cancellation order in the **Federal Register**.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of Availability.

**SUMMARY:** The Agency is announcing the availability of a Pesticide Registration Notice titled "Labeling Revisions Required by the Final Rule 'Pesticide Management and Disposal; Standards for Pesticide Containers and Containment.'" PR Notices are issued by the Office of Pesticide Programs (OPP) to inform pesticide registrants and other interested persons about important policies, procedures, and registration related decisions and serve to provide guidance to pesticide registrants and OPP personnel. This particular PR Notice provides guidance to registrants on how to change their labels to comply with the new labeling requirements established by the container and containment rule. By August 17, 2009, all pesticide products distributed or sold by a registrant must

bear labels that comply with the new requirements.

This action may be of particular interest to those persons who are required to register pesticides. **II. What Guidance Does this PR Notice Provide?**

On August 16, 2006, the Agency published a Final Rule titled "Pesticide

Management and Disposal; Standards for Pesticide Containers and Containment" (71 FR 47330) (FRL 8076-2) that established standards for pesticide containers and containment structures. Among other things, the final rule established requirements for label language to include the following: A statement identifying the container as refillable or nonrefillable; instructions to facilitate the removal of pesticides from containers prior to disposal or recycling; and, for nonrefillable containers, instructions for managing the container. This notice provides instructions to pesticide registrants on revising their product labels in order to implement the new requirements. Most registrants may be able to make the necessary label amendments by notification; however, in some cases an application for amendment and EPA approval may be required. By August 17, 2009, all pesticide products distributed or sold by a registrant must have labels that comply with the new requirements (40 CFR 156.159). The Agency is releasing this PR Notice as a final document and not for comment because it implements final regulations currently in place. The container and containment rule was released for public comment before the final rule was published.

**III. Do PR Notices Contain Binding Requirements?**

The PR Notice discussed in this document is intended to provide guidance to EPA personnel and decision makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, this PR Notice is not binding on pesticide registrants.
