Proposed Determination To Prohibit, Restrict, or Deny the Specification, or the Use for Specification, of an Area as a Disposal Site; Yazoo River Basin, Issaquena County, MS

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 404(c) of the Clean Water Act (CWA) authorizes the Environmental Protection Agency (EPA) to prohibit, restrict, or deny the discharge of dredged or fill material at defined sites in waters of the United States (including wetlands) whenever it determines, after notice and opportunity for public hearing, that use of such sites for disposal would have an unacceptable adverse impact on various resources, including fisheries, wildlife, municipal water supplies, and recreational areas. Pursuant to section 404(c), EPA Region 4 is today requesting public comments on its proposal to prohibit or restrict the use of certain waters in the Yazoo River Basin in Issaquena County, Mississippi as disposal sites for dredged or fill material in connection with the construction of the proposed Yazoo Backwater Area Project (the project). As the primary component of this project, the U.S. Army Corps of Engineers, Vicksburg District (the Corps) and the Board of Mississippi Levee Commissioners (project sponsor) propose to construct a 14,000 cubic feet per second (cfs) pumping station at Steele Bayou with a pump-on operation elevation of 87.0 feet, National Geodetic Vertical Datum (NGVD). The construction and operation of the proposed pumps would degrade the critical functions and values of approximately 67,000 acres of wetland resources in the Yazoo River Basin. Of this total, approximately 26,300 acres would be hydrologically modified to the extent that they would no longer be defined as wetlands and would lose CWA regulatory protection. The natural timing, frequency, and duration of water reaching the remaining approximately 40,700 acres of wetlands would be impacted by the proposed pumping, altering the wetlands' ecological characteristics and significantly reducing their functions. EPA Region 4 believes that these extensive hydrological modifications of wetlands in the Yazoo River Basin could have an unacceptable adverse effect on fisheries and wildlife resources.

EPA seeks comment on this proposed 404(c) determination to prohibit or restrict the discharge of dredged or fill material in wetlands and other waters in the Yazoo River Basin in connection with the construction of the project or any pumping proposal in the Yazoo Backwater Area that would involve significant adverse impacts on waters of the United States. See Solicitation of Comments, at the end of the public notice, for further details.
