Designation of Medically Underserved Populations and Health Professional Shortage Areas

AGENCY: Department of Health and Human Services (HHS).

ACTION: Notice of proposed rulemaking; extension of public comment period and clarification.

SUMMARY: On February 29, 2008, HHS published a notice of proposed rulemaking, "Designation of Medically Underserved Populations and Health

Professional Shortage Areas" (73 FR 11232), to revise and consolidate the criteria and processes for designating medically underserved populations (MUPs) and health professional shortage areas (HPSAs). HHS provided a 60-day public comment period, with written comments to be received on or before April 29, 2008. HHS and the Health Resources and Services Administration (HRSA) have received requests for an extension of the comment period. In consideration of these requests, HHS is extending the comment period an additional 30 days, with a new closing date of May 29, 2008.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

FOR FURTHER INFORMATION CONTACT: Andy Jordan, (301) 594-0197.

SUPPLEMENTARY INFORMATION: HRSA is concerned that the publication of the proposed HPSA/MUP regulation has created misapprehension among some health center grantees regarding their ability to meet the proposed HPSA/MUP designation criteria, and in particular, their eligibility for current or expanded health center funding opportunities. The proposed rule includes three methods for making designations. As proposed, none of the three methods would limit health center eligibility for current, new or expanded funding.

Currently, all of the designations are made on data that are submitted by States or communities. Under the proposed rule, this submission burden would be reduced by HRSA's use of nationally available data for initial calculations. In addition, States or communities continue to have the option to submit more specific or current local data as an alternative for use in calculations. This option may be particularly important to accurately reflect local demographic and health service realities. For example, an urban area may include a subpopulation with high needs, or a rural area may have recently experienced an acute loss of primary care providers.

In addition to the Tier 1 method, the proposed rule includes two new designation methods. The first new method (Tier 2) assures that areas/organizations are not disadvantaged by the presence of federally-supported resources. The second new method (Safety Net Facility) allows those organizations that serve high need populations to maintain or pursue designation. If none of the above methods produces a designation, this proposed rule continues the possibility of designation at the request of the Governor pursuant to existing law (section 330(b)(3)(D), Public Health Service Act).
