

Water Project (SWP) water users. The Draft Supplemental EIS/EIR addressed changes to the regulatory and physical environment that have occurred since completion of the Final EIS/EIR in January 2004 (69 FR 3599) and the Records of Decision in March 2004 and September 2004.

DATES: Reclamation will not make a decision on the proposed action until at least 30 days after release of the Final Supplemental EIS/EIR. After the 30-day waiting period, Reclamation will complete a Record of Decision (ROD). The ROD will state the action that will be implemented and will discuss all factors leading to the decision.

ADDRESSES: A compact disk of the Final Supplemental EIS/EIR may be requested from Ms. Sammie Cervantes, by writing to Bureau of Reclamation, 2800 Cottage Way, Sacramento, CA 95825; by calling 916-978-5189 (TDD 916-978-5608); or by e-mailing scervantes@mp.usbr.gov. FOR FURTHER INFORMATION CONTACT: Ms. Sammie Cervantes, Bureau of Reclamation, at 916-978-5189 (TDD 916-978-5608) or scervantes@mp.usbr.gov.

SUPPLEMENTARY INFORMATION: The CVP and SWP facilities that pump water from the Delta can entrain and kill fish, some of which are Federally and State protected species. Reductions in CVP and SWP pumping to protect these fish species can reduce water supply reliability. The EWA Program includes Federal and State agencies making environmentally beneficial changes in the operation of the CVP and SWP for Delta-dependent native fish species, and acquiring and managing water assets to pay back the water foregone by changes to the operation of the CVP and SWP. The Service, Reclamation, DWR, NMFS, and DFG collectively manage the EWA Program. The Service, NMFS, and DFG are responsible for recommending actions that protect and benefit Delta-dependent fish populations. Reclamation and DWR are responsible for acquiring water assets from willing sellers and storing, conveying, and delivering the assets to the CVP and SWP at appropriate times and locations.

The Draft Supplemental EIS/EIR documented the direct, indirect, and cumulative effects to the physical, natural, and socioeconomic environment that may result from the

purchase, storage, and conveyance of EWA assets, and the actions taken to benefit Delta-dependent fish populations. The Draft Supplemental EIS/EIR focused on an analysis of impacts to fisheries in the Delta because there have been multiple changes in the regulatory and physical environment since the ROD was signed in September 2004.

Copies of the Final Supplemental EIS/EIR are available for public review at the following locations:
