

transmission lines (totaling 205 acres) would be disturbed as a result of development of such a facility. Again, additional site-specific NEPA analysis, subsequent to the planned PEIS, would be required prior to construction of any facilities.

The proposed action was developed based upon national and Department of Defense laws, directives, and policies. Successful implementation of the proposed action would be the first step to provide additional non-hydrocarbon based power generation that will help the Navy meet its renewable energy goals established by the President of the United States, the Secretary of Defense, and the Secretary of Navy. Development would be undertaken by a third-party contractor using a Public/Private Venture contracting mechanism. This business model has been successfully demonstrated with other geothermal projects.

The Navy considered a range of alternatives and has developed preliminary alternatives based on issues, concerns, and opportunities identified from previous experience with geothermal development on Navy lands, public scoping comments, collaboration with interdisciplinary professionals from the Navy and BLM, and collaboration with interested agencies. Three alternatives are expected to be considered in this PEIS at this time:

1. Initiate Geothermal Development Program in Project Area;
2. Initiate Geothermal Development Program in Reduced Project Area;
3. No Action Alternative.

Additional or revised alternatives may be developed out of the impact analysis and might be designed to avoid or reduce adverse impacts while still meeting the purpose and need for the proposed action. As an example, an alternative might be developed to avoid possible land use conflicts, or to prevent ultimate development near areas of sensitive resources.

The PEIS will address potential direct, indirect, short term, long term, and cumulative impacts to the human and natural environment, to include potential impacts to topography, geology, soils, water resources, biological resources, air quality, noise, infrastructure and utilities, traffic, cultural resources, land use, socioeconomics, environmental justice, and hazardous waste and materials.

The Navy is initiating the scoping process to identify community concerns and issues that should be addressed in the PEIS. The Navy is inviting written comments and suggestions on the scope of the analysis for the PEIS. Agencies

and the public are encouraged to provide written comments in addition to, or in lieu of, oral comments at scheduled public scoping meetings. Comments should clearly describe specific issues or topics that the PEIS should address. Written comments must be postmarked by midnight July 5, 2008 and should be submitted to: Mr. Steven Bjornstad, Geothermal Program Office (ESC-25), Naval Air Weapons Station, 429 East Bowen Road, Mail Stop 4011, China Lake, CA 93555-6108. Comments will also be accepted by midnight July 5, 2008 on the project Web site at <http://www.superstitionmountaineis.com>.

[Docket Nos. ER07-1289-002; ER07-1289-003; ER07-1289-004; ER07-1289-005]

ISO New England Inc.; Notice Shortening Response Time

April 24, 2008.

On April 22, 2008, New England Power Pool Participants Committee, ISO New England Inc., MEPCO H.Q. Energy Services (U.S.), Inc. and the Participating Transmission Owners Administrative Committee (collectively, Joint Movants) filed a Joint Emergency Motion to Establish Hearing Procedures in the above-referenced proceeding (April 22 Motion). Included in the filing was a request to shorten the period for submission of answers to the Joint Movants' motion to April 25, 2008. On April 23, 2008, Casco Bay Energy Company, LLC, filed an answer opposing the Joint Movants' request to shorten the response period.

By this notice, the request to establish April 25, 2008 as the date for filing answers to the April 22 Motion is denied. However, we will shorten the response period to and including May 2, 2008.

Kimberly D. Bose,
Secretary.
