Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–639–5960 and send comments to Maryam I. Daneshvar, CDC Acting Reports Clearance Officer, 1600 Clifton Road, MS–D74, Atlanta,

GA 30333 or send an e-mail to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Health Marketing—New—National Center for Health Marketing (NCHM), Coordinating Center for Health Information and Service (CCHIS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC is globally recognized for conducting research and investigations and for its action oriented approach. CDC applies research and findings to improve people's daily lives and responds to health emergencies—something that distinguishes CDC from its peer agencies.

CDC is committed to achieving true improvements in people's health. To do this, the agency is defining specific health protection goals to prioritize and focus its work and investments and measure progress.

It is imperative that CDC provide high-quality timely information and programs in the most effective ways to help people, families, and communities protect their health and safety. Through continuous consumer feedback,

prevention research, and public health information technology, we identify and evaluate health needs and interests, translate science into actions to meet those needs, and engage the public in the excitement of discovery and the progress being made to improve the health of the Nation. In our outreach to partners, we build relationships that model shared learning, mutual trust, and diversity in points of view and sectors of society.

The National Center for Health Marketing (NCHM) of the Coordinating Center for Health Information and Service (CCHIS) was established to help ensure that health information, interventions, and programs at CDC are based on sound science, objectivity, and continuous customer input.

NCHM is requesting a 3-year approval for the generic concept of health marketing to provide feedback on the development, implementation and satisfaction regarding public health services, products, communication campaigns and information. The information will be collected using standard qualitative and quantitative methods such as interviews, focus groups, and panels, as well as questionnaires administered in person, by telephone, by mail, by e-mail, and online. More specific types of studies may include: user experience and user-testing; concept/product/package development testing; brand positioning/identity research; customer satisfaction surveying; ethnography/observational studies; and mystery shopping. The data will be used to provide input to the development, delivery and communication of public health services and information at CDC and to address emerging programmatic needs.

Every National Center and Office at CDC will have the opportunity to utilize this generic clearance. There is no cost to the respondents other than their time.
