II. Did EPA Approve the Applications?

The Agency approved the applications after considering all required data on risks associated with the proposed use of Extract of *Chenopodium ambrosioides* near *ambrosioides*, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of Extract of *Chenopodium ambrosioides* near *ambrosioides* when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

III. Approved Applications

EPA issued a notice, published in the **Federal Register** of May 18, 2005 (70 FR 28524) (FRL-7706-5), which announced that Codena, Inc., c/o of Landis International Inc., P.O. 5126, Valdosta, GA 31603-5126, had submitted three applications to register the pesticide products, FACIN TECHNICAL, FACIN 25 EC, and FACIN 50 ME for use as biochemical insecticides and acaricides (EPA File Symbols 81978-R, 81978-E, and 81978-G respectively), containing Extract of *Chenopodium ambrosioides* var. *amcrosiosdes*.

Subsequent to the **Federal Register** notice of May 18, 2005, the applications were transferred to Agraquest, Inc., 1540 Drew Avenue, Davis, CA 95618. FACIN 50 ME was withdrawn and the remaining product names were changed.

Needs and Uses: Congress has mandated that after February 17, 2009, full-power television broadcast stations must transmit only in digital signals, and may no longer transmit analog signals. On December 22, 2007, the Commission adopted a Report and Order, In the Matter of the Third Periodic Review of the Commission's Rules and Policies Affecting the Conversion to Digital Television, MB Docket No. 07-91, FCC 07-228 ("Third DTV Periodic Report and Order") to establish the rules, policies and procedures necessary to complete the nation's transition to DTV. In the Report

and Order, the Commission adopted rules to ensure that, by the February 17, 2009 transition date, all full-power television broadcast stations (1) cease analog broadcasting and (2) complete construction of, and begin operations on, their final, full-authorized post-transition (DTV) facility. The Commission recognized that broadcasters may need regulatory flexibility in order to achieve these goals. Accordingly, the Commission affords broadcasters the opportunity for regulatory flexibility, if necessary, to meet their DTV construction deadlines. The Commission, however, must also ensure that no consumers are left behind in the DTV transition. Therefore, the Commission requires broadcasters that choose to reduce or terminate TV service to comply with viewer notification requirements.

Specifically, as a result of the Third DTV Periodic Report and Order, stations must comply with a viewer notification requirement (*i.e.*, stations must notify viewers about their planned service reduction or termination) if:

(1) The station will permanently reduce or terminate analog or pre-transition digital service before the transition date; or

(2) The station will not serve at least the same population that receives their current analog TV and DTV service after the transition date.

Viewer notifications must occur every day on-air at least four times a day including at least once in primetime for the 30 days prior to the station's termination of full, authorized analog service. These notifications must include: (1) The station's call sign and community of license; (2) the fact that the station must delay the construction and operation of its post-transition (DTV) service or the fact that the station is planning to or has reduced or terminated its analog or digital operations before the transition date; (3) information about the nature, scope, and anticipated duration of the station's post-transition service limitations; (4) what viewers can do to continue to receive the station, *i.e.*, how and when the station's digital signal can be received; (5) information about the availability of digital-to-analog converter boxes in their service area; and (6) the street address, e-mail address (if available), and phone number of the station where viewers may register comments or request information.
