*Total Annual Costs:* None.

*Confidentiality:* No need for confidentiality required.

*Privacy Impact Assessment(s):* No impact(s).

*Needs and Uses:* On November 27, 2007, the Commission adopted a Report and Order in MM Docket 00-168, FCC 07-205, In the Matter of Standardized and Enhanced Disclosure Requirements for Television Broadcast Licensee Public Interest Obligations. The Report and Order requires that twice daily, the station identification for television stations must include a notice of the existence, location and accessibility of the station's public file pursuant to 47 CFR 73.1201(b)(3). The notice must state that the station's public file is available for inspection and that consumers can view it at the station's main studio and on its Web site. At least one of the announcements must occur between the hours of 6 p.m. and midnight.

47 CFR 73.1201(a) requires television broadcast licensees to make broadcast station identification announcements at the beginning and ending of each time of operation, and hourly, as close to the hour as feasible, at a natural break in program offerings. Television and Class A television broadcast stations may make these announcements visually or aurally.

47 CFR 73.1201(b)(1) requires that the official station identification consist of

the station's call letters immediately followed by the community or communities specified in its license as the station's location; provided that the name of the licensee, the station's frequency, the station's channel number, as stated on the station's license, and/or the station's network affiliation may be inserted between the call letters and station location. DTV stations, or DAB Stations, choosing to include the station's channel number in the station identification must use the station's major channel number and may distinguish multicast program streams. For example, a DTV station with major channel number 26 may use 26.1 to identify an HDTV program service and 26.2 to identify an SDTV program service. A radio station operating in DAB hybrid mode or extended hybrid mode shall identify its digital signal, including any free multicast audio programming streams, in a manner that appropriately alerts its audience to the fact that it is listening to a digital audio broadcast. No other insertion between the station's call letters and the community or communities specified in its license is permissible.

47 CFR 73.1201(b)(3) requires that twice daily, the station identification for television stations must include a notice of the existence, location and accessibility of the station's public file. The notice must state that the station's public file is available for inspection and that consumers can view it at the station's main studio and on its Web site. At least one of the announcements must occur between the hours of 6 p.m. and midnight.

47 CFR 74.783(e) permits any low-power television (LPTV) station to request a four-letter call sign after receiving its construction permit. All initial LPTV construction permits will continue to be issued with a five-character LPTV call sign. LPTV respondents are required to use the online electronic system. To enable these respondents to use this online system, the Commission eliminated the requirement that holders of LPTV construction permits submit with their call sign requests a certification that the station has been constructed, that physical construction is underway at the transmitter site, or that a firm equipment order has been placed.

47 CFR 74.783(b) requires licensees of television translators whose station identification is made by the television station whose signals are being rebroadcast by the translator, must secure agreement with this television licensee to keep in its file, and available to FCC personnel, the translator's call

letters and location, giving the name, address and telephone number of the licensee or service representative to be contacted in the event of malfunction of the translator.

47 CFR 74.1283(c)(1) requires FM translator stations whose station identification is made by the primary station to furnish current information on the translator's call letters and location. This information is kept in the primary station's files. This information is used to contact the translator licensee in the event of malfunction of the translator.
