

methyl methacrylate (PMMA) acrylic sheet subject to 40 CFR part 63, subpart FFFF?

A: Yes. EPA determines Spartech's operations produce a material (PMMA) classified using the United States Standard Industrial Classification (SIC) code 282 or North American Industry Classification System (NAICS) code 325, and its operations meet all the other criteria for applicability under 40 CFR 63.2435.

Abstract for [Z070002]

Q1: Is Anadarko's double-chamber cyclonator forced-air solid waste incinerator with a capacity of 2.4 tons per day, constructed after November 1999, that has been seasonally located and intermittently operated at remote oil and gas exploration sites on the North Slope of Alaska since January 2003, subject to 40 CFR part 60, subpart CCCC?

A1: Yes, EPA concludes that a waste incinerator with a capacity of 2.4 tons per day, constructed after November 1999, that has been seasonally located and intermittently operated at remote oil and gas exploration sites on the North Slope of Alaska is subject to NSPS subpart CCCC. EPA considers this incinerator to be located at an industrial facility, and regardless of the fact that the incinerator may be moved from one location to the next, it will be a distinct operating unit of an industrial facility.

Q2: Is 40 CFR part 61, subpart E, applicable to an incineration unit that incinerates untreated sanitary waste (solids) collected from Pacto toilets?

A2: No. EPA considers the Mercury NESHAP to apply to "those stationary sources which * * * incinerate or dry wastewater treatment plant sludge." Under 40 CFR 61.51, sludge is defined as "sludge produced by a treatment plant that processes municipal or industrial waste waters." The practice of incinerating sanitary waste composed of untreated solids from Pacto toilets does not meet the description of incinerating sludge under the Mercury NESHAP. Thus, the Mercury NESHAP would not apply.

Abstract for [Z080001]

Q: Does EPA consider the gas processing system which includes reciprocating internal combustion (IC) engines at the Austin Community Landfill in Austin, Texas, to be treatment under 40 CFR part 60, subpart WWW, pursuant to 40 CFR 60.752(b)(2)(iii)(C)?

A: Yes. EPA considers the specified compression, filtration, and moisture removal from the landfill gas for use in an energy recovery device to be

treatment under NSPS subpart WWW, pursuant to 40 CFR 60.752(b)(2)(iii)(C). Because the engines will be exempt from monitoring, they do not have to be included in the Startup, Shutdown, and Malfunction (SSM) Plan required by 40 CFR part 63, subpart AAAA. However, the treatment system supplying gas to the IC engines will have to be included in the SSM Plan.

Abstract for [Z080002]

Q: Does EPA consider the gas processing system which includes two turbines at the DFW Recycling and Disposal Facility in Lewisville, Texas, to be treatment under 40 CFR part 60, subpart WWW, pursuant to 40 CFR 60.752(b)(2)(iii)(C)?

A: Yes. EPA considers the specified compression, filtration, and moisture removal from the landfill gas for use in an energy recovery device to be treatment under NSPS subpart WWW, pursuant to 40 CFR 60.752(b)(2)(iii)(C). Because the turbines will be exempt from monitoring, they do not have to be included in the Startup, Shutdown, and Malfunction (SSM) Plan required by 40 CFR part 63, subpart AAAA. However, the treatment system supplying gas to the turbines will have to be included in the SSM Plan.
