SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-58407; File No. SR-DTC-2008-10]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make Technical Changes to the Collateral Loan System

August 21, 2008.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ notice is hereby given that on August 1, 2008, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described in Items I, II, and III below, which items have been prepared primarily by DTC. DTC filed the proposal pursuant to Section 19(b)(3)(A)(iii) of the Act² and Rule 19b-4(f)(4)³ thereunder so that the proposal was effective upon filing with the Commission. The Commission is publishing this notice to solicit

comments on the rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the rule change is to (i) modify record layouts for the Collateral Loan System to comply with the new Symbology series key defined by the Options Symbology Initiative ("OSI") and (ii) implement record layout changes that will allow The Options Clearing Corporation ("OCC") members to process collateral loan transactions directly against OCC sub-accounts.⁴

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.⁵

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Options Symbology Initiative

Currently organizations that support trading in listed options typically use a three to five alpha character representation. The first three characters identify the option root symbol, and the remaining two alpha characters identify the expiration month, call/put indicator, and strike price. In an effort to standardize option symbols and overhaul the existing method of identifying exchange-listed options contracts, OCC is spearheading an industry-wide adoption of the OSI.⁶

The OSI supports the elimination of alpha codes that are currently used to denote expiration month, call/put code, and strike price. As a result, DTC is proposing to modify its record layouts for DTC's Collateral Loan System to

⁵ The Commission has modified the text of the summaries prepared by DTC.
