

roughly six months within the same calendar year, the total burden hours are the same as the average annual burden hours. Each of the 550 properties selected for inspection will need to provide a knowledgeable staff member

to accompany the inspector during the 8 hour inspection. At each of the 140 PHAs selected, an average of three staff members (such as the executive director, director of modernization, engineer, or asset manager) will need to

spend a combined total of approximately 180 minutes responding to our information requests and follow-up questions.

Data collected	Number of respondents	Burden per respondent (minutes)	Total respondent burden (minutes)	Total respondent burden (hours)
Physical Inspections ¹	550	480	264,000	4,400
PHA Survey	420	60	25,200	420
Total	970	n.a.	289,200	4,820

¹ The physical inspection process is estimated to take about 8 hours per property. A building or property manager is expected to accompany the inspector during the inspection.

Alligator River National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of the Final Comprehensive Conservation Plan and Finding of No Significant Impact for Alligator River National Wildlife Refuge in Manteo, North Carolina.

SUMMARY: The Fish and Wildlife Service announces that a Final Comprehensive Conservation Plan and Finding of No Significant Impact for Alligator River National Wildlife Refuge is available for distribution. The plan was prepared pursuant to the National Wildlife Refuge System Improvement Act of 1997, and in accordance with the National Environmental Policy Act of 1969, and describes how the refuge will be managed for the next 15 years. The compatibility determinations for hunting, fishing, wildlife observation and photography, environmental education and interpretation, and trapping of selected furbearers are also available in the plan.

ADDRESSES: A copy of the plan may be obtained by writing to the Alligator River National Wildlife Refuge, P.O. Box 1969, Manteo, North Carolina 27954. The plan may also be accessed and downloaded from the Service's Web site: <http://southeast.fws.gov/planning/>.

SUPPLEMENTARY INFORMATION: The availability of the Draft Comprehensive Conservation Plan and Environmental Assessment for a 45-day public review and comment period was announced in the **Federal Register** on May 30, 2006 (71 FR 30687). The plan and environmental assessment identified and evaluated three alternatives for managing the refuge over the next 15 years. Alternative 1, the no-action

alternative, would have continued current management of the refuge. Alternative 3 would have resulted in substantial program increases.

Based on the environmental assessment and the comments received, the Service adopted Alternative 2 as its preferred alternative. Alternative 2 directs the development of programs to best achieve the refuge purpose and goals; emphasizes wildlife conservation as our highest priority in refuge management; collects habitat and wildlife data; and ensures long-term achievement of refuge and Service objectives. At the same time, these management actions provide balanced levels of compatible public use opportunities consistent with existing laws, Service policies, and sound biological principles. Alternative 2 provides the best mix of program elements to achieve desired long-term conditions.

Under this alternative, all lands under the management and direction of the refuge will be protected, maintained, and enhanced to best achieve national, ecosystem, and refuge-specific goals and objectives within anticipated funding and staffing levels. In addition, the action positively addresses significant issues and concerns expressed by the public.

Alligator River National Wildlife Refuge is located in Dare and Hyde Counties, North Carolina, about 3.5 hours east of Raleigh and 1.5 hours south of the Virginia line. The refuge covers a total of 153,017 acres within the 239,800-acre acquisition boundary and occupies the eastern-most portion of the Albemarle-Pamlico Peninsula in eastern North Carolina. The refuge is the lead refuge in the North Carolina Coastal Plain Refuge Complex and consists of a variety of habitats, including forested wetlands, shrub wetlands, agricultural lands, moist-soil areas, open waters, dirt/gravel access roads and trails, and recently reforested areas. Annually, more than 35,000 people visit the refuge.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we finalize the CCP process for Logan Cave National Wildlife Refuge. We started this process through a notice in the **Federal Register** on November 23, 2005 (70 FR 70878). For more about the process, see that notice.

Logan Cave National Wildlife Refuge was established in 1989 under the Endangered Species Act of 1973 to protect cave inhabitants, including the endangered gray bat (*Myotis grisescens*), Benton cave crayfish (*Cambarus aculabrum*), and the threatened Ozark cavefish (*Amblyopsis rosae*). The cave also has historically provided habitat for the endangered Indiana bat (*Myotis sodalis*). This 123-acre Ozark Mountain refuge, which includes a limestone solution cave with approximately 1.5
