What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under DATES.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are business or other for-profit, as well as State, Local, or Tribal governments.

Title: Information Requirements for Boilers and Industrial Furnaces: General Hazardous Waste Facility Standards, Specific Unit Requirements, and Part B Permit Application and Modification Requirements (Renewal).

ICR numbers: EPA ICR No. 1361.13, OMB Control No. 2050-0073.

ICR status: This ICR is currently scheduled to expire on February 28, 2009. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA regulates the burning of hazardous waste in boilers, incinerators, and industrial furnaces (BIFs) under 40 CFR parts 63, 264, 265, 266 and 270. This ICR describes the paperwork requirements that apply to the owners and operators of BIFs. This includes the requirements under the comparable/ syngas fuel specification at 40 CFR

261.38; the general facility requirements at 40 CFR parts 264 and 265, subparts B through H; the requirements applicable to BIF units at 40 CFR part 266; and the RCRA Part B permit application and modification requirements at 40 CFR part 270. Examples of paperwork collected under these requirements include one-time notices, certifications, waste analysis data, inspection and monitoring records, plans reports, RCRA Part B permit applications and modifications. The responses to the collection of information are mandatory. EPA needs this information for the proper implementation, compliance tracking, and fulfillment of the congressionally delegated mandate under RCRA to protect public health and the environment. EPA, however, has taken steps to minimize the burden imposed on the facilities, and ensures the confidentiality of the provided information by complying with Section 3007(b) of RCRA, Privacy Act of 1974 and OMB Circular #108. Based on information from the EPA Regions, we estimated at last renewal of this ICR that 91 BIF facilities are subject to the RCRA hazardous waste program. Of these, we estimate that 32 BIFs are currently under interim status and the remaining 59 are in permitted status. This renewal takes into account the current universe of the BIF facilities, and the current regulations applicable to them based on the amendments made to date.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2,626 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 91.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 22.

Estimated total annual burden hours: 238,997 hours.

Estimated total annual costs: \$33,665,000, includes \$7,855,000 annualized capital/startup cost, \$9,880,000 annual O&M costs and \$15,930,000 annual labor costs.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
