

the assisted mode, a track authority is obtained from the system and electronically issued to the individual requesting the authority by a controller or dispatcher. In the autonomous mode, the authority is electronically obtained directly from TrackAccess by the individual requesting the authority, and no dispatcher is involved. TrackAccess is designed for low traffic shortline, branchline, and yard rail operations. In the view of the petitioner, TrackAccess protects train movements, it does not direct train movements.

According to SCPR, safety features of TrackAccess include: (1) protection against the issuance of overlapping permissions; (2) positive identification and verification of individuals requesting and receiving permissions; (3) verification of receipt of safety bulletins prior to issuance of permissions; and (4) required "three-part communication" procedures for telephony transactions.

Although the current petition is from the named party, FRA anticipates that, should relief be granted to the named petitioner, other petitioners may step forward. In order to avoid duplicative publications and filings related to this request for temporary relief, FRA also requests comments regarding whether, and under what conditions, FRA should permit other parties similarly situated to subscribe to any relief provided in this docket.

FRA notes that the instant petition was not accompanied by supporting safety data. However, FRA is advised that such data will be filed. Accordingly, potential commenters are requested to monitor the docket status and respond when such data is filed.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA-2008-0004) and may be submitted by one of the following methods:

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

The LB Railco

[Docket Number FRA-2007-28613]

The LB Railco (LBRR), seeks a waiver of compliance from certain provisions of Safety Glazing Standards, 49 CFR Part 223, that requires certified glazing for

two self-propelled switcher locomotives.

LBRR has been operating for the past several years as an industrial switcher for the Port of San Francisco. LBRR plans to expand its operation from currently four (4) miles to seven (7) miles of track as the primary shortline railroad operator for the Port of San Francisco once a new bridge is completed. LBRR plans to continue to use the Port's two historic ALCO S-2 switcher locomotives (LB 1 and LB 2) to service their current two customers and any customers that may require switching service at the Port in the future.

LBRR operates at a maximum speed of 20 mph with an average speed of 5 mph. The two ALCO S-2 switcher locomotives both have their original glass in the cabs, consisting of 13 separate windows in each cab. The glazing in these windows do not conform to 49 CFR Part 223 Safety Glazing Standards; however, the locomotives have been operating for the past 62 years in and around the same area of San Francisco, in which they currently operate and the glass has remained intact without damage.

LBRR requests a waiver from 49 CFR Part 223 requirements for these two locomotives because the locomotives operate at very slow speeds in a safe area. Both locomotives have historic significance and by replacing the glazing would diminish the historic value with an estimated cost of \$15,000.00 to modify the glazing in each locomotive which would be prohibitively expensive.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

• **Hand Delivery:** 1200 New Jersey Avenue, SE., Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) at the above facility. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.
