[Docket No. CP08-36-000]

Chestnut Ridge, LLC; Notice of Availability of the Environmental Assessment for the Proposed JCT Storage Project

March 27, 2009.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Chestnut Ridge LLC in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act of 1969 (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of Chestnut Ridge LLC's proposed JCT Storage Project. Chestnut Ridge proposes to convert an existing, diminished natural gas production field—the West Summit Field, which extends from Fayette County, Pennsylvania into Preston and Monongalia Counties, West Virginia—into a gas storage facility with up to 25 billion cubic feet of working gas capacity and up to 500,000 dekatherms per day of injection and withdrawal capacity. Proposed construction would include:

- Recompletion/drilling of up to 25 injection/withdrawal or observation wells, 14 of which would be new wells and 11 existing wells;
- Construction of approximately 14 miles of gathering laterals from individual wells to a new compressor station;
- Construction of an approximate 25,000 horsepower compressor station;
- Construction of a 1,900 foot 24-inch diameter pipeline header connecting to a Columbia Gas pipeline;
- Construction of a 21.5-mile 24-inch diameter pipeline header connecting to the Dominion Transmission, Inc./Texas Eastern interstate pipeline;
- Construction of a 1.5 mile, 138-kilovolt radial transmission line to connect to the Junction Compressor Station with a switchyard and a switching and metering station; and,
- Construction of appurtenant facilities consisting of tap valves, pig launchers and receivers, meter and

regulator stations, separation and control systems, and access roads.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Copies of the EA have been mailed to federal, state, and local agencies; public interest groups; interested individuals; newspapers and libraries in the project area; Native America groups; and parties to this proceeding. Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below.

You can make a difference by providing us with your specific comments or concerns about the JCT Storage Project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that your comments are timely and properly recorded, please send your comments so that they will be received in Washington, DC on or before April 26, 2009.
