

Office of Energy Projects has reviewed the application for a new license for the DeSabra-Centerville Hydroelectric Project (project), located on Butte Creek in Butte County, California, and has prepared a final environmental assessment (final EA). In the final EA, Commission staff analyze the potential environmental effects of relicensing the project and conclude that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the final EA is on file with the Commission and is available for public inspection. The final EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document.
