The application sought NRC's consent to the indirect transfer of control of the NRC licenses for NRG South Texas' 44 percent ownership interest in STP, Units 1 and 2, and to the extent required, the Exelon Generation Company facilities' licenses as described in Exelon's January 29, 2009, application and supplemental letter dated March 18, 2009. As described in the application, the indirect transfer of STP would have occurred in connection with Exelon's plan to acquire control of NRG South Texas' parent, NRG Energy, Inc. (NRG), through a tender offer. A Notice of Hearing has not been issued subject to the application. This action relates to application for indirect transfer of control of licenses of STP, Units 1 and 2. The action related to Exelon's application for indirect transfer of Exelon Generation Company's units listed above is addressed in a separate action.

The Commission had previously issued Notice of Consideration of Approval of Application regarding proposed merger of NRG Energy, Inc. and Exelon Corporation published in the **Federal Register** on July 9, 2009 (74 FR 32967). However, by letter dated July

The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The NYBX is an electronic facility of the Exchange that provides continuous execution of all NYBX orders in NYSE-listed securities with the aggregate of all orders in the NYBX facility and displayed and non-displayed orders in the DBK. Orders entered into the NYBX facility are non-displayed orders. NYBX orders may be subject to certain conditions that can affect their ability to be executed. One type of condition is a minimum size desired for execution, known as the MTV. Executions on the NYBX will not trade through a protected quotation of an automated trading center.

The Exchange seeks to amend Exchange Rule 1600 to clarify the functionality of the NYBX facility in relation to an NYBX order's ability to execute with aggregated non-displayed contra side liquidity in the DBK. An automated market data feed into the NYBX facility enables the facility to read non-displayed liquidity in the DBK ("hidden data feed") and triggers the

⁷ The terms "protected quotations" and "trade through" have the same meaning as defined in Rule 600 of Regulation NMS. These terms have been added to the definition section of Rule 1600 in the proposed amendment (see proposed subsections (b)(2)(F) and (b)(2)(I)). The proposed rule change does not impact the facility's consideration of all protected quotations of automated trading centers.
