*Needs and Uses:* The Commission will submit this information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance from them. The Commission is requesting an extension (no change in the reporting requirement) of this information collection. The Commission is reporting no change in their burden estimates.

In a 1997 Memorandum Opinion and Order, the Commission requested that Bell Operating Companies (BOCs) provide certain information to the Commission regarding BOC requests for limited modification of local access and transport area (LATA) boundaries to provide local calling services (ELCS).

Section 271 of the Communications Act of 1934 ('the Act'), as amended, prohibits a BOC from providing "interLATA services originating in any of its 'in-region' States" until the BOC takes certain steps to open its own market to competition and the Commission approves the BOC's application to provide such service. Moreover, Section 10(d) prohibits the Commission from forbearing from applying the requirements of Section 271. However Section 3(25) of the Act provides that a BOC may modify LATA boundaries, if such modifications are approved by the Commission. Thus, for a BOC to provide service on a new ELCS route that crosses existing LATA boundaries, the Act requires that the BOC either modify the LATA so that the route no longer crosses a LATA boundary or satisfy the requirements of Section 271. Although the BOCs have otherwise satisfied the criteria for Section 271, this collection remains relevant in order to ensure that they fulfill their obligations under the Act and Commission policies and rules

regarding BOC provision of InterLATA services.

The Commission had found that LATA modification for the "limited purpose" of authorizing a BOC to provide flat-rate, non-optional local calling service between specific exchanges will meet community needs for traditional local telephone service while reducing the potential anticompetitive effects of general LATA modifications.

The guidelines ask that each ECLS request include the following information:

(1) Type of proposed service; (2) direction of proposed service; (3) telephone exchanges involved; (4) names of affected customers; (5) state commission approval; (6) number of access lines for customers; (7) usage data; (8) poll results; if any; (9) community of interest statement; (10) a map showing exchanges and LATA boundary involved; and (11) any other pertinent information.

A carrier will be deemed to have made a *prima facie* case supporting grant of the proposed modification if the petition: (1) Has been approved by the state commission; (2) that the state commission found a sufficient community interest to warrant such service; (4) documents this community of interest through such evidence as poll results, usage data, and descriptions of the communities involved; and (5) involves a limited number of customers or access lines. The guidelines will enable the Commission to ensure that BOCs are in compliance with the Act and Commission policies and rules regarding BOC provision of InterLATA services. The requested information is used by the Commission to determine whether the need for the proposed ELCS routes outweigh the risk of potential anticompetitive effects, and thus whether requests for limited modifications of LATA boundaries should be granted.

Federal Communications Commission.
