

In the construction of such a sophisticated system as a CBIS, complete adherence to the requirements of section 1605(a) is impracticable, if not impossible. In addition, it has become a serious obstacle to ensuring that all identified airports will be able to sign construction contracts by September 30, 2010. Some airport authorities have simply been unable or unwilling to certify that the construction contracts it signs are compliant with the buy American provisions. The alternative would be for the airports and communities to lose their Recovery Act assistance, requiring TSA to reallocate funds, which is inconsistent with the public interest and the intent and purpose of the Recovery Act.

DHS has considered the disproportionate cost and delay that would ensue if a limited waiver is not issued. The exercise of ascertaining whether compliant products exist or can be made to meet these requirements is already becoming a demanding and time-consuming task far out of proportion to the total percentage of project costs. On balance, the public interest in having these projects completed outweighs the Buy American requirement; particularly where the value of noncompliant goods is relatively small when compared to total project cost. CBIS projects significantly benefit aviation security, baggage screening efficiency and the flying public in general. Also, these projects help stimulate job growth for local construction workers, technicians, equipment designers, engineers, and others who will operate and maintain the equipment.

Therefore, the Secretary granted a limited, nationwide public interest waiver, having found that it would be inconsistent with the public interest—and particularly with the Recovery Act's directives—to apply the buy American requirement to an entire CBIS project in which at least 95 percent of the costs of the project will comply with section 1605. The Secretary determined the five percent limit based on research and informed professional judgment as to the maximum total amount of costs used in most CBIS projects.

Waiver

Accordingly, the Secretary granted a limited, nationwide waiver of the requirements of section 1605(a) of the Recovery Act, Public Law 111–5, buy American requirements, based on the public interest authority of section 1605(b)(1), provided that at least 95 percent of the costs of each TSA EBSP project will comply with section 1605.

This waiver applies to all eligible EBSP projects for which the TSA has awarded or will award a project award using Recovery Act funds, and where at least 95 percent of the costs of the project will comply with sec. 1605.

TSA will attempt to obtain 100 percent compliance with the buy American provision on all airport projects. This limited nationwide waiver is available to airports that cannot comply 100 percent with the buy American provision because applying the provision would be inconsistent with the public interest in accordance with sec. 1605(b)(1). TSA will ensure that on all projects at least 95 percent of the costs will comply with section 1605. Recipients who wish to use this waiver should, in consultation with their contractors determine the items to be covered by this waiver, must retain relevant documentation as to those items in their project files, and must summarize in reports to TSA the types and/or categories of items to which this waiver is applied, the total cost of the goods covered by the waiver, and the calculations by which they determined the total cost of materials used in and incorporated into the project.

Issued in Arlington, Virginia, on October 7, 2009.

Gale D. Rossides,

Acting Administrator.

SUPPLEMENTARY INFORMATION:

Abstract

The primary objective of the NCRDS is to advance the understanding of the energy endowment of the United States (U.S.) by gathering and organizing digital geologic information related to coal, coalbed gas, shale gas and other

energy resources. The NCRDS of the USGS will issue a call for proposals to support researchers that can provide geologic data to support the National Coal Resources Data System and other solid-fuel energy assessment projects being conducted by the Energy Resources Program. Additional data is needed to data to support regional or national assessments concerning coal and coal bed gas occurrences.

Requesting external cooperation is the very best way for NCRDS to collect energy data and perform research on the characterization of coals and organic-rich shale, and obtain other information (including geophysical or seismic data, sample collection for generation of thermal maturity data) that can be used in solid-fuel resource assessments. Data submitted to NCRDS by external cooperators will constitute more than two-thirds of the USGS point-source stratigraphic database (USTRAT) on coal occurrence. In 2010, NCRDS plans to support 26 projects in 23 States. The program will be conducted under various authorities, including 30 U.S.C. 208-1, 42 U.S.C. 15801, and 43 U.S.C. 31 *et seq.* This collection will consist of applications, proposals and reports (annual and final).
