SUPPLEMENTARY INFORMATION:

I. Introduction

On March 16, 2009, the CFTC promulgated final rules implementing provisions of the CFTC Reauthorization Act of 2008 ("Reauthorization Act")¹ which subjects ECMs with significant price discovery contracts ("SPDCs") to self-regulatory and reporting requirements, as well as certain Commission oversight authorities, with respect to those contracts. Among other things, these rules and rule amendments revise the information-submission requirements applicable to ECMs, establish procedures and standards by which the Commission will determine whether an ECM contract performs a significant price discovery function, and provide guidance with respect to compliance with nine statutory core principles applicable to ECMs with SPDCs. These rules became effective on April 22, 2009.

In determining whether an ECM's contract is or is not a SPDC, the Commission will consider the contract's material liquidity, price linkage to other contracts, potential for arbitrage with other contracts traded on designated contract markets or derivatives transaction execution facilities, use of the ECM contract's prices to execute or settle other transactions, and other factors.

In order to facilitate the Commission's identification of possible SPDCs,

¹ 74 FR 12178 (Mar. 23, 2009); these rules became effective on April 22, 2009.
