SUPPLEMENTARY INFORMATION:

I. Abstract

The primary objective of the National Climate Change and Wildlife Science Center (NCCWSC) will be to assist the Department of the Interior (DOI) in establishing a network of geographically dispersed DOI Regional Climate

Response Centers (Centers), as described in the Department of the Interior Secretarial Order 3289 (<http://www.doi.gov/climatechange/index.html>). These Centers will be co-located at cooperating organizations at non-USGS facilities. The Centers will include NCCWSC staff that report to a national USGS office, but will involve other DOI or collaborating Bureaus. The goal of the NCCWSC and the affiliated Regional Centers is to work in close partnership with the climate change science; ecological or hydrological science; and natural and cultural resource management communities to understand high priority science needs for climate adaptation and to develop science and information products that can help resource managers develop strategies for responding to climate change.

The purpose of this information collection is to identify institutions that are willing to host a Regional Center, and determine if their science and partnership capabilities are sufficient to serve as a host organization. Host organizations must be able to contribute climate science and ecological capabilities that complement and enhance USGS scientific and computational capacity, and those of other science partners. Host science collaborations and experience with regional national and cultural
