**Proposed Project:** Facts for Consumers about Health IT Service Providers—OMB No. 0990-NEW-OS/Office of the National Coordinator for Health Information Technology.

**Abstract:** A new health information technology, the personal health record (PHR), seeks to provide consumers with the capability to directly manage their own health information. Although PHRs can exist in different formats or media (i.e., paper or electronic), the term usually refers to an online record containing an individual's personal health information. PHRs typically include information such as health history, vaccinations, allergies, test results, and prescription information. Given the newness of the electronic PHR concept, the different ways to establish PHRs, and the sensitivity of personal health information, the Office of the National Coordinator for Health Information Technology (ONC) is taking steps to establish that useful facts about PHRs and PHR privacy policy information be made available to consumers so they can make informed decisions about selecting and using PHRs. Toward this end, ONC has a project to develop an online model for PHR providers. The model will be developed to:

- Allow presentation of important PHR facts and policies to consumers,
