

media note released on December 21, 2004.

In order for shrimp harvested with Turtle Excluder Devices (TEDs) in an uncertified nation to be eligible for importation into the United States under the exemption: "Shrimp harvested by commercial shrimp trawl vessels using TEDs comparable in effectiveness to those required in the United States", the Department of State must determine in advance that the government of the harvesting nation has put in place adequate procedures to ensure the accurate completion of the DS-2031 forms. At this time, the Department has made such a determination only with respect to Australia, Brazil and France. Thus, the importation of TED-caught shrimp from any other uncertified nation will not be allowed. For Brazil, only shrimp harvested in the northern shrimp fishery are eligible for entry under this exemption. For Australia, shrimp harvested in the Exmouth Gulf Prawn Fishery, the Northern Prawn Fishery, the Queensland East Coast Trawl Fishery and the Torres Strait Prawn Fishery is eligible for entry under this exemption. For France, shrimp harvested in the French Guiana domestic trawl fishery are eligible for entry under this exemption.

In addition, the Department has already made a determination with regard to wild-harvest shrimp harvested in the Spencer Gulf region in Australia. This product may be exported to the U.S. using a DS-2031 under the exemption for "shrimp harvested in a manner or under circumstances determined by the Department of State not to pose a threat of the incidental taking of sea turtles." An official of the Government of Australia still also must certify the DS-2031.
