BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Petition for Exemption From the Vehicle Theft Prevention Standard; Ford Motor Company

AGENCY: National Highway Traffic Safety Administration (NHTSA).
Department of Transportation (DOT).

ACTION: Grant of petition for exemption.

SUMMARY: This document grants in full the Ford Motor Company's (Ford) petition for an exemption of the Explorer vehicle line in accordance with § 543.9(c)(2) of 49 CFR Part 543, *Exemption from the Theft Prevention Standard*. This petition is granted because the agency has determined that the antitheft device to be placed on the line as standard equipment is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of the Theft Prevention Standard (49 CFR Part 541). Ford requested confidential treatment for the attachments it submitted in support of its petition. The

agency will address Ford's request for confidential treatment by separate letter.

DATES: The exemption granted by this notice is effective beginning with the 2011 model year.

FOR FURTHER INFORMATION CONTACT: Ms. Carlita Ballard, Office of International Policy, Fuel Economy and Consumer Programs, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. Ms. Ballard's telephone number is (202) 366–0846. Her fax number is (202) 493–2990.

SUPPLEMENTARY INFORMATION: In a petition dated December 11, 2009, Ford requested an exemption from the parts-marking requirements of the Theft Prevention Standard (49 CFR Part 541) for the MY 2011 Ford Explorer vehicle line. The petition requested an exemption from parts-marking pursuant to 49 CFR Part 543, *Exemption from Vehicle Theft Prevention Standard*, based on the installation of an antitheft device as standard equipment for an entire vehicle line.

Under § 543.5(a), a manufacturer may petition NHTSA to grant exemptions for one vehicle line per model year. In its petition, Ford provided a detailed description and diagram of the identity, design, and location of the components of the antitheft device for the Explorer vehicle line. Ford will install its

SecuriLock antitheft device (also known as the Passive Antitheft System or PATS) on the 2011 Explorer as standard equipment. Ford stated that it will also offer its Intelligent Access with Push Button Start (IAwPB) antitheft device as optional equipment. Ford stated that both systems are passive, electronic immobilizer devices that use encrypted transponder technology. Key components of the SecuriLock/PATS antitheft device will include an electronic transponder key, transceiver module, ignition lock, and a passive immobilizer. Key components of the IAwPB device is an electronic keyfob, remote function actuator, body control module, power train control module and a passive immobilizer. Ford stated that its MY 2011 Explorer vehicle line will also be equipped with several other standard antitheft features common to Ford vehicles, (*i.e.*, counterfeit resistant VIN labels; secondary VINs, cabin accessibility through the use of a valid key fob or keycode). Ford further stated that there will also be a separate visible and audible perimeter alarm available on its Explorer vehicle line. The alarm will be available as an option on vehicles with the SecuriLock/PATS device and included as standard equipment on vehicles with the IAwPB device. Ford's submission is considered

a complete petition as required by 49 CFR 543.7, in that it meets the general requirements contained in § 543.5 and the specific content requirements of § 543.6.

Ford stated that the devices integration of the transponder into the normal operation of the ignition key assures activation of the system. Ford further stated that both devices are always active and require no other operator action. Specifically, in the SecuriLock device, when the ignition key is turned to the "start" position, the transceiver module reads the ignition key code and transmits an encrypted message from the keycode to the control module, which then determines key validity and authorizes engine starting by sending a separate encrypted message to the powertrain control module (PCM). In the IAWPB device, when the "startstop" button is pressed, the transceiver module reads the key code and transmits an encrypted message from the keycode to the control module to determine validity and authorizes engine starting by sending a separate encrypted message to the body control module (BCM), the PEP/RFA module and the PCM. Ford pointed out that in addition to the programmed key, the three modules that must be matched to allow start of the vehicle adds even an additional level of security to the IAWPB device and in both devices, if the codes do not match, the powertrain engine starter, spark and fuel will be disabled.

In addressing the specific content requirements of 543.6, Ford provided information on the reliability and durability of its proposed device. To ensure reliability and durability of the device, Ford conducted tests based on its own specified standards. Ford provided a detailed list of the tests conducted and believes that the device is reliable and durable since the device complied with its specified requirements for each test.

Ford also stated that incorporation of several features in both devices further support reliability and durability of the devices. Specifically, some of those features include: encrypted communication between the transponder, control function and the power train control module; no moving parts; inability to mechanically override the device to start the vehicle; and the body control module/remote function actuator and the power train control module share security data that during vehicle assembly form matched modules that if separated from each other will not function in other vehicles.

Ford compared the device proposed for its vehicle line with other devices

which NHTSA has determined to be as effective in reducing and deterring motor vehicle theft as would compliance with the parts-marking requirements. Ford stated that it believes that the standard installation of either the SecuriLock device or the IAWPB device would be an effective deterrent against vehicle theft.

Ford stated that it installed the SecuriLock device on all MY 1996 Ford Mustang GT and Cobra models and other selected models. Ford stated that in the 1997 model, the SecuriLock device was extended to the complete Ford Mustang vehicle line as standard equipment. Ford also stated that according to the National Insurance Crime Bureau (NICB) theft statistics, MY 1997 Mustangs installed with the SecuriLock device showed a 70% reduction in theft rate compared to the MY 1995 Mustangs. Ford also reported that the SecuriLock device is currently offered as standard equipment on most of its North American Ford, Lincoln and Mercury vehicles but is offered as optional equipment on its F-series Super Duty pickups, Econoline and Transit Connect vehicles. Ford stated that with MY 2011, the IAWPB device will be offered as standard equipment on the Lincoln MKT and optionally on the Lincoln MKS, MKX, Taurus, Edge and the Explorer vehicles.

Ford also referenced theft rate data published by NHTSA showing that the theft rate for the Explorer is lower than the median theft rate for all vehicles from MY's 2000–2006. Ford stated that the 2011 Explorer will be comparable in vehicle segment, size and equipment (including the SecuriLock device) to those Explorer/Mercury Mountaineer vehicles for which theft rate data is currently available (between MYs 2004 and 2006). Ford stated that since either the SecuriLock device or the IAWPB device is the primary theft deterrent on Ford Explorer vehicles, it believes that theft rates for the Explorer will improve or continue comparatively lower in the future than the theft rates experienced by its Explorer/Mercury Mountaineer vehicles between MYs' 2004–2006. The theft rate for the Ford Explorer using two MYs' data (2004–2005) data is 1.6797 and theft rate for the Mercury Mountaineer using three MYs data is 1.3361.

The agency agrees that the device is substantially similar to devices in other vehicle lines for which the agency has already granted exemptions. Based on the evidence submitted by Ford, the agency believes that the anti-theft device for the Explorer vehicle line is likely to be as effective in reducing and deterring motor vehicle theft as compliance with

the parts-marking requirements of the Theft Prevention Standard (49 CFR Part 541).

Pursuant to 49 U.S.C. 33106 and 49 CFR 543.7 (b), the agency grants a petition for exemption from the parts-marking requirements of Part 541 either in whole or in part, if it determines that, based upon substantial evidence, the standard equipment anti-theft device is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of Part 541. The agency finds that Ford has provided adequate reasons for its belief that the anti-theft device for the Ford Explorer vehicle line is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of the Theft Prevention Standard (49 CFR Part 541). This conclusion is based on the information Ford provided about its device.

The agency concludes that the device will provide four of the five types of performance listed in § 543.6(a)(3): promoting activation; preventing defeat or circumvention of the device by unauthorized persons; preventing operation of the vehicle by unauthorized entrants; and ensuring the reliability and durability of the device.

For the foregoing reasons, the agency hereby grants in full Ford's petition for exemption for the Explorer vehicle line from the parts-marking requirements of 49 CFR Part 541. The agency notes that 49 CFR Part 541, Appendix A–1, identifies those lines that are exempted from the Theft Prevention Standard for a given model year. 49 CFR Part 543.7(f) contains publication requirements incident to the disposition of all Part 543 petitions. Advanced listing, including the release of future product nameplates, the beginning model year for which the petition is granted and a general description of the anti-theft device is necessary in order to notify law enforcement agencies of new vehicle lines exempted from the parts-marking requirements of the Theft Prevention Standard.

If Ford decides not to use the exemption for this line, it must formally notify the agency. If such a decision is made, the line must be fully marked according to the requirements under 49 CFR Parts 541.5 and 541.6 (marking of major component parts and replacement parts).

NHTSA notes that if Ford wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Part 543.7(d) states that a Part 543 exemption applies only to vehicles that belong to a line

exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, Part 543.9(c)(2) provides for the submission of petitions "to modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in that exemption."

The agency wishes to minimize the administrative burden that Part 543.9(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting Part 543 to require the submission of a modification petition for every change to the components or design of an antitheft device. The significance of many such changes could be *de minimis*. Therefore, NHTSA suggests that if the manufacturer contemplates making any changes, the effects of which might be characterized as *de minimis*, it should consult the agency before preparing and submitting a petition to modify.

Authority: 49 U.S.C. 33106; delegation of authority at 49 CFR 1.50.

Issued on: May 25, 2010.

Stephen R. Kratzke,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Long Island Rail Road

[Waiver Petition Docket Number FRA-2010-0090]

The Long Island Rail Road (LIRR) seeks a waiver of compliance with the Locomotive Safety Standards, 49 CFR 229.129(b)(2), which requires that the sound level of locomotives manufactured before September 18, 2006, have their horns tested before June 24, 2010; and 49 CFR 229.129(c), which prescribes the testing requirements for testing locomotive horns.

LIRR operates 836 M-7 MU passenger cars of which 84 have had their horns

tested; and 170 M-3 MU passenger cars of which 60 have had their horns tested. In addition, LIRR operates 80 diesel electric locomotives of which 7 horns have been tested; and 23 control car locomotives of which 2 horns have been tested.

LIRR cites the previous winters (2009 and 2010) climatic conditions for failure to complete the required horn testing. LIRR is requesting an additional 6-month extension to complete the testing. Because of the constraints of their maintenance facilities, LIRR is also requesting that they be allowed to utilize an alternate testing standard. LIRR would do reference sample testing of locomotive horns as required in 49 CFR 229.129(c), and use the test results from the reference tests to develop an alternative test plan.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Docket Number 2010-0090) and may be submitted by any of the following methods:

- *Web site:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., W12-140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Avenue, SE., Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received within 30 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at <http://www.regulations.gov>.

Anyone is able to search the electronic form of any written communications and comments

received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78).

Issued in Washington, DC on May 24, 2010.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

Solicitation of Applications for Fiscal Year (FY) 2010 Motor Carrier Safety Assistance Program (MCSAP) High Priority Grant Funding

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice.

SUMMARY: FMCSA announces that on May 21 it published an opportunity to apply for FY 2010 MCSAP High Priority grant funding on the grants.gov Web site (<http://www.grants.gov>).

DATES: FMCSA will initially consider funding for applications submitted by July 1, 2010. If additional funding remains available, applications submitted after that date will be considered on a case-by-case basis.

FOR FURTHER INFORMATION CONTACT: Ms. Cim Weiss, Federal Motor Carrier Safety Administration, Office of Safety Programs, State Programs Division (MC-ESS), 202-366-0275, 1200 New Jersey Avenue, SE., Washington, DC 20590. Office hours are from 8:00 a.m. to 4:30 p.m., EST., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: The Consolidated Appropriations Act of 2010 provides grant funding for Commercial Motor Vehicle (CMV) safety programs as authorized under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, Public Law 111-147, 124 Stat. 71 (2010); Public Law 109-59, 119 Stat. 1144 (2005).

This notice announces the availability of approximately \$2,000,000 in un-awarded FY 2010 funding for MCSAP High Priority projects. These funds are available for activities conducted by State agencies, local governments, and organizations *representing government*
