Abstract: The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition. The Aquaculture Surveys collect information on both trout and catfish. The trout surveys include: Inventory counts, sales (dollars, pounds and quantity), percent of product sold by outlet at the point of first sale, number of fish raised for release into open waters, and losses. The catfish surveys include: inventory counts, water surface acreage used for production, sales (dollars, pounds, and quantity), number of catfish processed, and amount of catfish feed delivered to catfish producers. Survey results are used by government agencies in planning farm programs.

- Twenty-five States are in the trout growers' survey. In January, previous year trout sales data are collected from farmers and distributed fish data are collected from State and federal hatcheries.

- Nine States are in the catfish grower's survey. Data are collected from farmers in January for January inventory, water surface acreage, and previous year sales. In addition, farmers in the three major catfish producing States are surveyed in July for mid-year inventory and water surface acreage.

- All catfish processing plants, with the capacity to process 2,000 pounds of live weight per 8 hour shift are in the catfish processing survey. Plants are surveyed monthly for amount purchased, prices paid, amount sold, prices received, and end-of-month inventories.

- Fourteen catfish millers are surveyed monthly for the amount of feed delivered for food-size fish and fingerlings and broodfish.
