The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by removing the Class E airspace designated as a surface area at Chillicotte Municipal Airport, Chillicotte, MO. Airport and air traffic control facility management have determined that this airspace is no longer needed and would not compromise the safety and management of IFR operations at the airport, and that airport users would receive greater benefit from its removal.

Class E airspace areas are published in Paragraph 6002 of FAA Order 7400.9T, dated August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would remove controlled airspace at Chillicotte Municipal Airport, Chillicotte, MO.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of March 29, 2010 (75 FR 15387), FDA published an ANPRM with a 90-day comment period to request comments on the need for improvements to the VFD regulation.

The agency has received requests for a 60-day extension of the comment period for the ANPRM. The requests conveyed concern that the current 90-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to the ANPRM.

FDA has considered the requests and is extending the comment period for the ANPRM for 60 days, until August 27, 2010. The agency believes that a 60-day extension allows adequate time for interested persons to submit comments without significantly delaying rulemaking on these important issues.

II. Request for Comments

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) either electronic or written comments regarding this document. It is only necessary to send one set of comments. It is no longer necessary to send two copies of mailed comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Dated: June 22, 2010.

Acting Assistant Commissioner for Policy.
