

POLICY JUSTIFICATION**India – M777 155mm Light-Weight Towed Howitzers**

The Government of India has requested a possible sale of 145 M777 155mm Light-Weight Towed Howitzers with Laser Inertial Artillery Pointing Systems (LINAPS), warranty, spare and repair parts, support and test equipment, publications and technical documentation, maintenance, personnel training and training equipment, U.S. Government and contractor representatives' technical assistance, engineering and logistics support services, and other related elements of logistics support. The estimated cost is \$647 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to strengthen the U.S.-India strategic relationship and to improve the security of an important partner which continues to be an important force for political stability, peace, and economic progress in South Asia.

India intends to use the howitzers to modernize its armed forces and enhance its ability to operate in hazardous conditions. The howitzers will assist the Indian Army to develop and enhance standardization and to improve interoperability with U.S. Soldiers and Marines who use the M777 as their primary means of indirect fire. India will have no difficulty absorbing these weapons into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be, BAE of Hattiesburg, Mississippi; Watervliet Arsenal of Watervliet, New York; Seiler Instrument Company of St Louis, Missouri; Triumph Actuation Systems of Bloomfield, Connecticut; Taylor Devices of North Tonawanda, New York; Hutchinson Industries of Trenton, New Jersey; and Selex, Edinburgh, United Kingdom. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require annual trips to India involving up to eight (8) U.S. Government and contractor representatives for technical reviews/support, training, and in-country trials for a period of approximately two years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
