Veterinary Diagnostic Services User Fees

User fees to reimburse APHIS for the costs of providing veterinary diagnostic services are also contained in 9 CFR part 130. Veterinary diagnostics is the work performed in a laboratory to determine whether a disease-causing organism or chemical agent is present in body tissues or cells and, if so, to identify

those organisms or agents. Services in this category include: (1) Performing identification, serology, and pathobiology tests and providing diagnostic reagents and other veterinary diagnostic materials and services for the National Veterinary Services Laboratories (NVSL) in Ames, IA; and (2) performing laboratory tests and providing reagents and other veterinary diagnostic materials and services at the NVSL Foreign Animal Disease Diagnostic Laboratory (NVSL FADDL) in Greenport, NY.

User Fees for Export Certificates for Plants and Plant Products

Export certificates issued in accordance with the regulations certify agricultural products as being considered free from plant pests, according to the phytosanitary requirements of the foreign countries to which the plants and plant products may be exported. Export certificates are also issued to certify that reexported plants or plant products conform to the most current phytosanitary requirements of the

importing country and that, during storage in the United States, the consignment has not been subjected to risk of infestation or infection. These export certificates must be issued in accordance with 7 CFR part 353 to be accepted in international commerce.

In a final rule published in the **Federal Register** on July 8, 2009 (74 FR 32391-32400, Docket No. APHIS-2006-0137), and effective October 1, 2009, we established, for fiscal years 2007 through 2012 and beyond, user fees charged for export certification of plants and plant products.
