

designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

The applications received are as follows:

1. *Applicant*—Permit Application No. 2011–016, Paul Ponganis, Center for Marine Biotechnology and Biomedicine, Scripps Institution of Oceanography, University of California, San Diego, La Jolla, CA 92093–0204.

Activity for Which Permit Is Requested

Take, Enter Antarctic Specially Protected Areas, and Import into the USA. The applicant plans to study the diving physiology and behavior of emperor penguins at sea. Physiological responses underlie the dive capacity and the ability to successfully forage at depth. Heart rate, in particular, is key to the management of oxygen stores at seas, and the ability of birds to perform repetitive deep dives. The will deploy electro-cardiogram recorders and dive behavior recorders on birds making foraging trips to sea from Cape Washington.

In addition, censusing of birds will be conducted to continue the long term population monitoring of the Ross Sea emperor penguin population (day visits to Cape Crozier, ASPA 124 and Beaufort Island ASPA 105 colonies, aerial censuses of Franklin Island, Cape Colbeck, Coulman Island and Cape Roget, and photo/counting census at Cape Washington, including abandoned egg and chick carcass counts, and assessment of check health.)

Leopard seal research assesses the impact of leopard seals on the emperor colony as well as the hunting strategies of leopard seals. Leopard seals will be sedated for weighing and attachment of a backpack camera and radio transmitter. The camera and radio transmitter will be removed after about a week.

Location

Cape Crozier (ASPA 124), Beaufort Island (ASPA 105), and Cape Washington.

Dates

October 1, 2010 to December 31, 2011.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is considering an application dated July 20, 2010, by Uranium One USA, Inc. (the "Applicant"), requesting consent for an indirect change of control with respect to its NRC Materials License SUA-1341. Under this license, the Applicant operates the Irigaray and Christensen Ranch uranium *in situ* recovery milling facilities located in Johnson and Campbell Counties, Wyoming. The Applicant is a wholly owned subsidiary of Uranium One Exploration U.S.A., Inc. (a Delaware corporation), which is a wholly owned subsidiary of Uranium One Americas, Inc. (a Nevada corporation), which is a wholly owned subsidiary of Uranium One Investments, Inc. (a Canadian corporation), which is a wholly owned subsidiary of Uranium One, Inc. (a Canadian corporation). On June 8, 2010, Uranium One, Inc. entered into a Purchase and Subscription Agreement with JSC Atomredmetzoloto (ARMZ) (a Russian corporation) and its wholly owned subsidiaries Effective Energy N.V. (a Dutch limited liability company) and Uranium Mining Company (a Russian corporation), wherein ARMZ will acquire no less than 51 percent of Uranium One, Inc.'s common shares. ARMZ is presently directly and indirectly owned by the State Atomic Energy Corporation Rosatom (Rosatom). Rosatom's activities are regulated by Russian Federal Law No. 317-EZ and by regulatory legal acts of the President of the Russian Federation and the Government of the Russian Federation adopted in accordance with Russian Federal Law. Consummation of the transaction would result in the indirect change of control of the Applicant and license SUA-1341 from Uranium One, Inc. to Rosatom, through ARMZ. The Applicant is requesting that the NRC consent to this change of control.

The application states that there would be no change to the Applicant's operations, its key operating personnel, or its licensed activities as a result of the transaction. After closing of the transaction, and if the indirect change of control is approved by the NRC, the Applicant would continue to be the holder of license SUA-1341. The Applicant would remain technically and financially qualified as the licensee and would continue to fulfill all responsibilities as the licensee. An administrative license amendment would be necessary to reflect a change
