ENVIRONMENTAL PROTECTION AGENCY

[FRL-9322-7; Docket ID No. EPA-HQ-ORD-2009-0398]

Toxicological Review of Methanol (Non-Cancer): In Support of Summary Information on the Integrated Risk Information System (IRIS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public comment period on draft addendum and peer review workshop.

SUMMARY: On April 18, 2011, EPA released the external peer review draft human health assessment titled "Toxicological Review of Methanol (Non-Cancer): In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/635/R-11/001) for public comment. The public comment period ended June 17, 2011. EPA is releasing an addendum to the draft Toxicological Review of Methanol (Non-Cancer) and announcing a 14-day public comment period for the addendum.

The purpose of this addendum is to provide the public with several recent studies that were published between the initial release of the methanol assessment in January 2010 and the recent re-release of the non-cancer portion of that assessment in April 2011. Due to the unusual step of placing the methanol assessment on hold (as described in the April 18, 2011 **Federal Register** Notice), and the length of time that elapsed since the initial release of the assessment, EPA decided to issue

the addendum addressing additional studies. Description and analyses of these studies are included as an addendum to the draft Toxicological Review that is now available on EPA's Web site (see below for details).

The draft Toxicological Review and the draft addendum were prepared by the National Center for Environmental Assessment (NCEA) within the EPA Office of Research and Development (ORD). EPA is releasing the draft addendum solely for the purpose of pre-dissemination peer review and public comment under applicable information quality guidelines. This draft assessment has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination.

EPA is also announcing that Eastern Research Group, Inc. (ERG), an EPA contractor for external scientific peer review, will convene an independent panel of experts and organize and conduct an external peer review workshop to review the draft Toxicological Review of Methanol (Non-Cancer), including the addendum. ERG invites the public to register to attend this workshop as observers. In addition, ERG invites the public to give brief oral comments and/or provide written comments at the workshop regarding the draft assessment under review. Space is limited, and reservations will be accepted on a first-come, first-served basis. In preparing a final report, EPA will consider the ERG report of the comments and recommendations from the external peer review workshop and any written public comments that EPA receives in accordance with the April 18, 2011, Notice and this Notice.

DATES: The public comment period on the draft addendum to the Toxicological Review of Methanol (Non-Cancer) begins June 22, 2011, and ends July 6, 2011. Comments should be in writing and must be received by EPA by July 6, 2011.

The peer review panel workshop on the Toxicological Review of Methanol (Non-Cancer) will be held on July 22, 2011, beginning at 8:30 a.m. and ending at 5 p.m. Eastern Time.

ADDRESSES: The draft addendum to the "Toxicological Review of Methanol (Non-Cancer): In Support of Summary Information on the Integrated Risk Information System (IRIS)" is available primarily via the Internet on the NCEA home page under the Recent Additions and Publications menus at <http://www.epa.gov/ncea>. SUPPLEMENTARY INFORMATION:

I. Information About IRIS

EPA's IRIS is a human health assessment program that evaluates quantitative and qualitative risk information on effects that may result from exposure to chemical substances found in the environment. Through the IRIS Program, EPA provides the highest quality science-based human health assessments to support the Agency's regulatory activities. The IRIS database contains information for more than 540 chemical substances that can be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, IRIS provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic noncancer health effects and cancer assessments. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.
