

III. Discussion

Section 17A(b)(3)(F) of the Act¹³ requires, among other things, that the rules of a clearing agency be designed to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible. The Commission believes that because the proposed rule change creates a more direct correlation between OCC's clearing fund size and potential losses from a defined set of default scenarios, it should better enable OCC to fulfill this statutory obligation.

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposal is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act¹⁴ and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,¹⁵ that the proposed rule change (File No. SR–OCC–2011–10) be, and hereby is, approved.¹⁶

For the Commission by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its rules in order to simplify the \$1 Strike Price Interval Program. The text of the proposed rule change is available on the Exchange's Web site <http://www.ise.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Supplementary Material .01 to ISE Rule 504 in order to simplify the \$1 Strike Price Interval Program (“Program”). This filing is based on a filing previously submitted by the Chicago Board Options Exchange, Inc. (“CBOE”).³

In 2003, the Commission issued an order permitting the Exchange to establish the Program on a pilot basis.⁴ At that time, the underlying stock had to close at \$20 on the previous trading day in order to qualify for the Program. The range of available \$1 strike price intervals was limited to a range between \$3 and \$20 and no strike price was permitted that was greater than \$5 from the underlying stock's closing price on

the previous trading day. Series in \$1 strike price intervals were not permitted within \$0.50 an existing strike. In addition, the Exchange was limited to selecting five (5) classes and reciprocal listing was permitted. Furthermore, LEAPS in \$1 strike price intervals were not permitted for classes selected to participate in the Program.

The Exchange renewed the pilot program on a yearly basis and in 2008, the Commission granted permanent approval of the Program.⁵ At that time, the Program was expanded to increase the upper limit of the permissible strike price range from \$20 to \$50. In addition, the number of class selections per exchange was increased from five (5) to ten (10). Since the Program was made permanent, the number of class selections per exchange has been increased from ten (10) classes to 55 classes⁶ and subsequently increased from 55 classes to 150 classes.⁷

Amendments To Simplify Non-LEAPS Rule Text

The most recent expansion of the Program was approved by the Commission in early 2011 and increased the number of \$1 strike price intervals permitted within the \$1 to \$50 range.⁸ This expansion was a proposal of another exchange and ISE submitted its filing for competitive reasons. This expansion, however, has resulted in very lengthy rule text that is complicated and difficult to understand. ISE believes that the proposed changes to simplify the rule text of the Program will benefit market participants since the Program will be easier to understand and will maintain the expansions made to the Program in early 2011. Through the current proposal, the Exchange also hopes to make administration of the Program easier, *e.g.*, system programming efforts. To simplify the rules of the Program and, as a proactive attempt to mitigate any unintentional listing of improper strikes, ISE is proposing the following streamlining amendments:

- When the price of the underlying stock is equal to or less than \$20, permit \$1 strike price intervals with an exercise price up to 100% above and 100%

below the price of the underlying stock.⁹

- However, the above restriction would not prohibit the listing of at least five (5) strike prices above and below the price of the underlying stock per expiration month in an option class.¹⁰

- For example, if the price of the underlying stock is \$2, the Exchange would be permitted to list the following series: \$1, \$2, \$3, \$4, \$5, \$6 and \$7.¹¹

- When the price of the underlying stock is greater than \$20, permit \$1 strike price intervals with an exercise price up to 50% above and 50% below the price of the underlying security up to \$50.¹²

- For the purpose of adding strikes under the Program, the “price of the underlying stock” shall be measured in the same way as “the price of the underlying security” is as set forth in Rule 504(A)(b)(i).¹³

- Prohibit the listing of additional series in \$1 strike price intervals if the underlying stock closes at or above \$50 in its primary market and provide that additional series in \$1 strike price intervals may not be added until the underlying stock closes again below \$50.¹⁴

Amendments To Simplify LEAPS Rule Text

The early 2011 expansion of the Program permitted for some limited listing of LEAPS in \$1 strike price intervals for classes that participate in

the Program. The Exchange is proposing to maintain the expansion as to LEAPS, but simplify the language and provide examples of the simplified rule text. These changes are set forth subparagraph (v) to Supplementary Material .01(b).

For stocks in the Program, the Exchange may list one \$1 strike price interval between each standard \$5 strike interval, with the \$1 strike price interval being \$2 above the standard strike for each interval above the price of the underlying stock, and \$2 below the standard strike for each interval below the price of the underlying stock (“\$2 wings”). For example, if the price of the underlying stock is \$24.50, the Exchange may list the following standard strikes in \$5 intervals: \$15, \$20, \$25, \$30 and \$35. Between these standard \$5 strikes, the Exchange may list the following \$2 wings: \$18, \$27 and \$32.¹⁵

In addition, the Exchange may list the \$1 strike price interval which is \$2 above the standard strike just below the underlying price at the time of listing. In the above example, since the standard strike just below the underlying price (\$24.50) is \$20, the Exchange may list a \$22 strike. The Exchange may add additional long-term options series strikes as the price of the underlying stock moves, consistent with the OLPP.

Non-Substantive Amendments to Rule Text

The early 2011 expansion of the Program prohibited the listing of \$2.50 strike price intervals for classes that participate in the Program. This prohibition applies to non-LEAP and LEAPS. The Exchange proposes to maintain this prohibition and codify it in Supplementary Material .01(a) (Program Description).

For ease of reference, the Exchange is proposing to add the headings “Program Description,” “Initial and Additional Series” and “LEAPS” to Supplementary Material .01.

The Exchange is proposing to more accurately reflect the nature of the Program and is proposing to make stylistic changes throughout Supplementary Material .01 by adding the phrase “price interval.” Lastly, the Exchange is making technical changes

to Supplementary Material .01, *e.g.*, replacing the word “security” with the word “stock.”

The Exchange represents that it has the necessary systems capacity to support the increase in new options series that will result from the proposed streamlining changes to the Program.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”)¹⁶ and the rules and regulations thereunder and, in particular, the requirements of Section 6(b) of the Act.¹⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁸ requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, to remove impediments to and to perfect the mechanism for a free and open market and a national market system, and, in general, to protect investors and the public interest. In particular, the proposed rule change seeks to reduce investor confusion and to simplify the provisions of the \$1 Strike Price Interval Program.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not significantly affect the protection of investors or the public interest, does not impose any significant burden on competition, and, by its terms, does not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section

⁹ See proposed new subparagraph (i) to Supplementary Material .01(b).

¹⁰ *Id.*

¹¹ *Id.*

¹² See proposed new subparagraph (ii) to Supplementary Material .01(b).

¹³ See proposed new subparagraph (iii) to Supplementary Material .01(b). Rule 504A(b)(i) provides, “[t]he price of a security is measured by: (1) For intra-day add-on series and next-day series additions, the daily high and low of all prices reported by all national securities exchanges; (2) for new expiration months, the daily high and low of all prices reported by all national securities exchanges on the day the Exchange determines it preliminary notification of new series; and (3) for option series to be added as a result of pre-market trading, the most recent share price reported by all national securities exchanges between 8:45 a.m. and 9:30 a.m. (Eastern Time).”

¹⁴ See proposed new subparagraph (iv) to Supplementary Material .01(b). The Exchange believes that it is important to codify this additional series criterion because there have been conflicting interpretations among the exchanges that have adopted similar programs. The \$50 price criterion for additional series was intended when the Program was originally established (as a pilot) in 2003. See Securities Exchange Act Release No. 48033 (June 16, 2003) 68 FR 37036 (June 20, 2003) (SR-ISE-2003-17) (“ISE may list an additional expiration month provide that the underlying stock closes below \$20 on its primary market on expiration Friday. If the underlying stock closes at or above \$20 on expiration Friday, ISE will not list an additional month for a \$1 strike series until the stock again closes below \$20.”)

¹⁵ The Exchange notes that a \$2 wing is not permitted between the standard \$20 and \$25 strikes in the above example. This is because the \$2 wings are added based on reference to the price of the underlying and as being between the standard strikes above and below the price of the underlying stock. Since the price of the underlying stock (\$24.50) straddles the standard strikes of \$20 and \$25, no \$2 wing is permitted between these standard strikes.

¹⁸ 15 U.S.C. 78f(b)(5).

19(b)(3)(A) of the Act¹⁹ and Rule 19b-4(f)(6) thereunder.²⁰

The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposal is substantially similar to that of another exchange that has been approved by the Commission.²¹ Therefore, the Commission designates the proposal operative upon filing.²²

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.
