FOR FURTHER INFORMATION CONTACT: Linh N. Tran, Senior Project Manager, Research and Test Reactor Licensing Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Rockville, MD 20852. Telephone: 301-415-4103; fax number: (301) 415-3031; e-mail: Lihn.Tran@nrc.gov.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC, the Commission) has issued renewed Facility Operating License No. R-76, held by the Washington State University (WSU, the licensee), which authorizes continued operation of the WSU Modified TRIGA Nuclear Reactor, located in Pullman, Whitman County, Washington. The WSU Modified TRIGA Nuclear Reactor is a pool-type, natural convection, light-water cooled, and shielded reactor that was converted to the use of TRIGA (Training, Research, Isotope Production, General Atomics) fuel. The WSU NRCR is licensed to operate at a steady-state power level of 1 megawatt thermal power and pulse mode operation with a peak pulse power of 2,000 megawatt. The renewed Facility Operating License No. R-76 will expire 20 years from its date of issuance.

The renewed facility operating license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in Title 10, Chapter 1, "Nuclear Regulatory Commission," of the *Code of Federal Regulations* (10 CFR), and sets forth those findings in the renewed facility

operating license. The agency afforded an opportunity for hearing in the Notice of Opportunity for Hearing published in the **Federal Register** on June 28, 2010 (75 FR 36717–36721). The NRC received no request for a hearing or petition for leave to intervene following the notice.

The NRC staff prepared a safety evaluation report for the renewal of Facility Operating License No. R–76 and concluded, based on that evaluation, the licensee can continue to operate the facility without endangering the health and safety of the public. The NRC staff also prepared an Environmental Assessment and Finding of No Significant Impact for the renewal of the facility operating license, noticed in the **Federal Register** on April 19, 2011 (76 FR 2192821931), and concluded that renewal of the facility operating license will not have a significant impact on the quality of the human environment.

Dated at Rockville, Maryland, this 30th day of September, 2011.

For The Nuclear Regulatory Commission.

Patricia A. Silva,

Acting Chief, Research and Test Reactors Licensing Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Request for Information: Building A 21st Century Bioeconomy

ACTION: Notice of Request for Information (RFI).

SUMMARY: The purpose of this Request for Information (RFI) is to solicit input from all interested parties regarding recommendations for harnessing biological research innovations to meet national challenges in health, food, energy, and the environment while creating high-wage, high-skill jobs.

The public input provided through this Notice will inform the Office of Science and Technology Policy (OSTP) as it works with Federal agencies and other stakeholders to develop a National Bioeconomy Blueprint.

DATES: October 7, 2011—December 6, 2011.

ADDRESSES:

BIOECONOMY@OSTP.GOV.

SUPPLEMENTARY INFORMATION:

Purpose

The purpose of this Request for Information (RFI) is to solicit input from all interested parties regarding recommendations for harnessing biological research innovations to meet national challenges in health, food, energy, and the environment while creating high-wage, high-skill jobs.

The public input provided through this Notice will inform the Office of Science and Technology Policy as it works with Federal agencies and other stakeholders to develop a National Bioeconomy Blueprint.

Background

On September 16, 2011, President Obama announced that his Administration will develop a National Bioeconomy Blueprint detailing Administration-wide steps to harness biological research innovations to address national challenges in health, food, energy, and the environment. Biological research underpins the foundation of a significant portion of our economy. By better leveraging our national investments in biological research and development, the Administration will grow the jobs of the future and improve the lives of all Americans.

Twenty-first century advances in biological research and technologies are poised to return tremendous public benefits. For example, advances in human genome-informed personalized medicine and data analytics could be combined to improve human health in novel ways. In bio-based industry, biological design can create new opportunities for biofuels, chemicals, materials, and energy-efficient manufacturing processes.

The National Bioeconomy Blueprint will identify strategies to meet grand challenges, promote commercialization and entrepreneurship, focus research and development investments in areas that will provide the foundation for the bioeconomy, expand workforce training to prepare the next generation of scientists and engineers for the bioeconomy jobs of the future, identify regulatory reforms that will reduce unnecessary burdens on innovators while protecting health and safety, and describe appropriate public-private partnerships to accelerate innovation in key areas.

OSTP seeks comment on the questions listed below to inform the development of the National Bioeconomy Blueprint:

Grand challenges: President Obama has identified “grand challenges” as an important element of his innovation strategy, such as “smart anti-cancer therapeutics that kill cancer cells and leave their normal neighbors untouched; early detection of dozens of diseases from a saliva sample; personalized medicine that enables the prescription of the right dose of the right drug for the right person; a universal vaccine for influenza that will protect against all future strains; and regenerative medicine that can end the agonizing wait for an organ transplant.”

(1) Identify one or more grand challenges for the bioeconomy in areas such as health, energy, the environment, and agriculture, and suggest concrete
