Judith B. Herman, Office of Managing Director, (202) 418-0214.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0859.

Title: Suggested Guidelines for Petitions for Ruling Under Section 253 of the Communications Act of 1934, as amended.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities and State, Local, or Tribal Government.

Number of Respondents: 24 respondents; 24 responses.

Estimated Time per Response: 63 to 125 hours.

Frequency of Response: On occasion reporting requirement.

Obligation To Respond: Voluntary. Statutory authority for this information collection is contained in 47 U.S.C. Section 253 of the Communications Act of 1934, as amended.

Total Annual Burden: 1,698 hours.

Total Annual Cost: N/A.

Privacy Impact Assessment: N/A.

Needs and Uses: The Commission will submit this expiring information collection to the OMB after this comment period in order to obtain the full three year clearance from them. The Commission is requesting an extension (with no change in the reporting requirement). There is a reduction in the estimated number of respondents/responses and the annual burden hours because very few requests for preemption pursuant to section 253 have been filed in recent years.

The Commission published a Public Notice in November 1998 which established various guidelines for the filing of petitions for preemption pursuant to section 253 of the Communications Act of 1934, as amended, as well as guidelines for the filing of comments opposing such requests for preemption. The Commission will use this information to discharge its statutory mandate relating to the preemption of state or local statutes, regulations, or other state or local legal requirements.

Section 253 of the Communications Act of 1934, as amended; added by the Telecommunications Act of 1996, requires the Commission, with certain important exceptions, to preempt (to the extent necessary) the enforcement of any state or local statute or regulation, or other state or local legal requirement that prohibits or has the effect of prohibiting any entity from providing any interstate or intrastate telecommunications service. The

Commission's consideration of preemption under section 253 typically begins with the filing of a petition by an aggrieved party. The Commission typically places such petitions on public notice and requests comment by interested parties. The Commission's decision is based on the public record, generally composed of the petition and comments. The Commission has considered a number of preemption items since the passage of the Telecommunications Act of 1996, and believes it is the public interest to inform the public of the information necessary for full consideration of the issues likely to be involved in section 253 preemption actions. In order to render a timely and informed decision, the Commission expects petitioners and commenters to provide it with relevant information sufficient to describe the legal regime involved in the controversy and to provide the factual information necessary for a decision.

Federal Communications Commission.

Secretary, Office of the Secretary, Office of Managing Director.

Proposed Project: Evaluation of Pregnancy Prevention Approaches: Follow-Up Data Collection—Revision—OMB No. 0990-0382—Office of Adolescent Health.

Abstract: The Office of Adolescent Health (OAH), Office of the Assistant Secretary for Health (OASH), U.S. Department of Health and Human Services (HHS), is requesting approval by OMB on a revised data collection. OAH is overseeing and coordinating adolescent pregnancy prevention evaluation efforts as part of the Teen Pregnancy Prevention Initiative. OAH is working collaboratively with the Office of the Assistant Secretary for Planning and Evaluation (ASPE), the Centers for

Disease Control and Prevention (CDC), and the Administration for Children and Families (ACF) on adolescent pregnancy prevention evaluation activities.

OAH is overseeing the Pregnancy Prevention Approaches Evaluation (PPA). The PPA Evaluation is a random assignment evaluation, which will expand available evidence on effective ways to reduce teen pregnancy. The evaluation will document and test a range of pregnancy prevention approaches in up to seven program sites. The findings from this evaluation will be of interest to the general public, to policy-makers, and to organizations interested in teen pregnancy prevention.

OAH is proposing a data collection activity as part of the PPA Evaluation. The proposed activity involves the collection of follow-up data from a self-administered questionnaire, which will be analyzed to determine program effects. Through a survey instrument, respondents will be asked to answer carefully selected questions about demographics and risk and protective factors related to teen pregnancy. Respondents: The data will be collected through private, phone-administered questionnaires with study participants, i.e. adolescents assigned to a select school or community teen pregnancy prevention program or control group. Trained professional staff will administer a paper and pencil survey over the phone.
