

reporting system (76 FR 37750; June 28, 2011) or July 15, 2012, whichever occurs first. We are still working on integrating the Atlantic HMS electronic dealer reporting system with other existing and new electronic programs in the Northeast and Southeast regions. Once the electronic dealer system is available, we will conduct training workshops and webinars to introduce and train dealers how to use the new system before implementation. Thus, we do not expect the system to be in place before July 15, and will open the commercial Atlantic region non-sandbar LCS fishery on July 15, 2012.

All of the shark fisheries will remain open until December 31, 2012, unless we determine that the fishing season landings have reached, or are projected to reach, 80 percent of the available quota. At that time, consistent with § 635.27(b)(1), we will file for publication with the Office of the Federal Register a closure action for that shark species group and/or region that will be effective no fewer than 5 days from the date of filing. From the effective date and time of the closure until we announce, via a **Federal Register** action that additional quota, if any, is available, the fishery for the shark species group and, for non-sandbar LCS, region will remain closed, even across fishing years, consistent with § 635.28(b)(2).

**SUPPLEMENTARY INFORMATION:** The original notice for the SEDAR 28 Review Workshop was published in the **Federal Register** on December 28, 2011 (76 FR 81479). This notice changes the date of that workshop and adds additional workshops for SEDAR 28.

The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR includes three workshops: (1) Data Workshop, (2) Stock Assessment Workshop and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Stock Assessment Workshop is a stock assessment report which describes the

fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Consensus Summary documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Panelists for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. SEDAR participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

*SEDAR 28 Assessment Workshops via Webinar Schedule (all times Eastern):*

The established time may be adjusted as necessary to accommodate the timely completion of discussion relevant to the data workshop process. Such adjustments may result in the meeting being extended from, or completed prior to the time established by this notice.

*Revised SEDAR 28 Review Workshop Schedule:*

**October 29–November 2, 2012; SEDAR 28 Review Workshop**
