Background

In 1973, Congress mandated an export sales reporting requirement to ensure that all parties involved in the production and export of U.S. grain have access to up-to-date export information. There was concern that large grain companies had an advantage because they had more information than the public on future prices and grain trade trends. Prior to the establishment of the export sales reporting requirements, it was difficult for the public to obtain information on exports until such commodities were actually shipped.

Authorized under Section 602 of the Agricultural Trade Act of 1978, as amended (7 U.S.C. 5712), the Export Sales Reporting Requirements mandate that exporters of wheat and wheat flour, feed grains, oil seeds, cotton, pork, beef and products thereof, and other commodities that the Secretary of Agriculture (the Secretary) may designate to report each week all of their export sales, regardless of the quantity, to the Secretary. The Export Sales Reporting Requirements regulation at 7 CFR 20.2 provides that the Foreign Agricultural Service (FAS), United States Department of Agriculture (USDA) administer the requirements and delegates authority to the FAS Administrator to promulgate amendments and revisions to the regulation. There are 39 commodities that are currently covered. This proposed rule would add reporting for pork (fresh, chilled, and frozen box/primal cuts) and DDG to the Export Sales Reporting Requirements.

In recent years, USDA has received numerous requests from the U.S. pork and DDG industries to add those commodities to the Export Sales Reporting Requirements. An internal review conducted by USDA supported the claim made by these industries that the addition of pork and DDG to the Export Sales Reporting Requirements would facilitate market transparency and enable the U.S. commodity markets and the U.S. industries to conduct more accurate and timely analysis on U.S. market conditions. More recently the Mandatory Price Reporting Act of 2010 (Pub. L. 111-239) mandates that pork be

added to the Export Sales Reporting Requirements.

Reporting under the Export Sales Reporting Requirements is mandatory. All exporters of U.S. commodities are required to report all sales, regardless of the size of the sale, of wheat (by class), wheat products, barley, corn, grain sorghum, oats, rye, soybeans, soybean cake and meal, soybean oil, flaxseed, linseed oil, cotton (by type), sunflowerseed oil, cottonseed, cottonseed cake and meal, cottonseed oil, rice (by class), cattle hides and skins (cattle, calf, and kip), wet blues (grain, unsplit, and split), and beef. The reporting period is Friday through Thursday each week.

Exporters provide information on the quantity of the sale transaction, the type and class of commodity, the marketing year of shipment, the export amount, and the destination. They also report any change of previously reported information, such as cancellations and changes in destination. A weekly summary of the export sales activity is published every Thursday at 8:30 a.m. eastern time, unless a change of time is announced. The "U.S. Export Sales" report does not provide data on individual firms, only a compilation of activity by commodity. Any person (exporter) who knowingly fails to make a report could be fined up to \$25,000, imprisoned for not more than one year, or both.

Additional "daily" sales reporting is required for wheat, corn, grain sorghum, barley, oats, soybeans, soybean cake and meal, and soybean oil. Daily sales reporting is required when sales of 100,000 metric tons (20,000 metric tons for soybean oil), or more, are made by a single exporter in one calendar day to one destination. In addition, sales totaling 200,000 metric tons (40,000 metric tons for soybean oil) made during the reporting week, excluding any previously reported daily sale, are also required to be reported under the daily sales reporting requirement. Daily sales are required to be reported to USDA by 3 p.m. eastern time no later than one day after the sale is made. Daily sales are summarized and released to the general public through a press announcement at 9:00 a.m. eastern time on the following business day and appear in the weekly report.

The "U.S. Export Sales Reports" are available electronically on the

INTERNET through the FAS Home Page <http://www.fas.usda.gov/export-sales/esrd1.html>. A paper copy is also available by subscription from the National Technical Information Service at <http://www.ntis.gov/products/usda-fas.aspx>.

Under this proposed rule, all exporters of U.S. pork and DDG would be required to report weekly information with respect to the export sales of pork and DDG to the Export Sales Reporting Branch, Office of Trade Programs, FAS, USDA. Required reportable information includes the quantity, destination, and marketing year of all pork and DDG export sales, changes in sales, and shipments per parameters identified in Appendix 1. A summary of the "U.S. Export Sales Reports" is published on FAS' Web site at <http://www.fas.usda.gov/export-sales/esrd1.html>, each Thursday at 8:30 a.m. eastern time. This change would not alter the current reporting schedule and would be undertaken using existing staff at no additional cost to the agency.

Adding pork and DDG to the Export Sales Reporting Requirements would provide an early indicator of export sales levels for these products thus improving market transparency and enabling commodity markets to better adjust to changing export activity. This proposed rule would allow for information on the total volume of sales and shipments to be available within two weeks of the export sale and shipment, rather than the nearly two-month delay experienced under the current system operated by the U.S. Bureau of the Census, which only reports actual exports.

With the pork and DDG export markets continuing to grow, the need for market transparency is becoming increasingly important. The current two-month lag in export data as available from the U.S. Bureau of the Census provides a window of opportunity for foreign buyers to buy quantities of U.S. product at prices that may be lower than if current market conditions were known. Export Sales Reporting data is released the week after the export sale takes place, thus providing a timelier indicator of current market conditions.

Executive Order 12866

The proposed rule has been determined to be significant under Executive Order 12866 and has been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act

The Regulatory Flexibility Act ensures that regulatory and information

requirements are tailored to the size and nature of small businesses, small organizations, and small governmental jurisdictions. This proposed rule will not have a significant economic impact on small businesses.

Executive Order 12372

Executive Order 12372, "Intergovernmental Review of Federal Programs," requires consultation with state and local officials. The objectives of the Executive Order are to foster an intergovernmental partnership and a strengthened federalism, by relying on state and local processes for state and local government coordination and review of proposed federal financial assistance and direct federal development. This rule neither provides federal financial assistance nor direct federal development; it does not provide either grants or cooperative agreements. Therefore this program is not subject to Executive Order 12372.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988. The provisions of this proposed rule would not have a preemptive effect with respect to any state or local laws, regulations, or policies which conflict with such provision or which otherwise impede their full implementation. The proposed rule would not have a retroactive effect. Before any judicial action may be brought forward regarding this proposed rule, all administrative remedies must be exhausted.

Executive Order 13132

The policies contained in this rule would not have any substantial direct effect on states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Nor would this rule impose substantial direct compliance costs on state and local governments. Therefore, consultation with the states is not required.

Executive Order 13175

This rule has been reviewed for compliance with Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments." This Executive Order imposes requirements on the development of regulatory policies that have Tribal implications or preempt tribal laws. The policies contained in this rule do not preempt Tribal law.

National Environmental Policy Act

The Administrator has determined that this action will not have a significant effect on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is necessary for this proposed rule.

Unfunded Mandates Reform Act (Pub. L. 104-4)

Public Law 104-4 requires consultation with state and local officials and Indian tribal governments. This proposed rule does not impose an unfunded mandate or any other requirement on state, local, or tribal governments. Accordingly, these requirements are not subject to the provisions of the Unfunded Mandates Reform Act.

Executive Order 12630

This Order requires careful evaluation of governmental actions that interfere with constitutionally protected property rights. This proposed rule would not interfere with any property rights and, therefore, does not need to be evaluated on the basis of the criteria outlined in Executive Order 12630.

Paperwork Reduction Act of 1995

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Secretary of Agriculture is requesting comments from all interested individuals and organizations on a proposed revision to the currently approved information collection for this program. This revision includes the proposed change in information collection activities related to the regulatory changes in this proposed rule.

DATES: Comments on this notice must be received by August 24, 2012 to be assured of consideration.

Additional Information or Comments: Peter W. Burr, Office of Trade Programs/Import Policies and Export Reporting Division/Export Sales Reporting Branch, FAS, USDA, 1400 Independence Avenue, Stop 1025, SW., Washington, DC 20520-1025; or by email at: esr@fas.usda.gov; or to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

SUPPLEMENTARY INFORMATION:

Title: Export Sales (Reporting Program) of U.S. Agricultural Commodities.

OMB Number: 0551-0007.

Expiration Date of Approval: January 31, 2014.

Type of Request: Revision of a currently approved information collection.

Abstract: Section 602 of the Agricultural Trade Act of 1978, as amended, (7 U.S.C. 5712) requires the reporting of information pertaining to contracts for export sale of certain specified agricultural commodities and other commodities that may be designated by the Secretary. The Secretary of Agriculture has the authority to add other commodities to this list. This proposed rule would add reporting for pork and DDG to the Export Sales Reporting Requirements. Regulations at 7 CFR part 20 implement the reporting requirements, and prescribe a system for reporting information pertaining to contracts for export sales.

USDA's Export Sales Reporting System was created after the large unexpected purchase of U.S. wheat and corn by the Soviet Union in 1972. To make sure that all parties involved in the production and export of U.S. grain have access to up-to-date export information, the U.S. Congress mandated an export sales reporting requirement in 1973. Prior to the establishment of the Export Sales Reporting System, it was difficult for the public to obtain information on export sales activity until the actual shipments had taken place.

Estimate of Burden: The average burden, including the time for reviewing instructions, gathering data needed, completing forms, and record keeping is estimated to be 30 minutes.

Respondents: All exporters of wheat and wheat flour, feed grains, oilseeds, cotton, rice, cattle hides and skins, beef,

pork, and any products thereof, and other commodities that the Secretary may designate as produced in the United States.

Estimated number of respondents: 360.

Estimated Number of Responses per Respondent: 252.37.

Estimated Total Annual Burden on Respondents: 45,427.

Requests for Comments: Send comments regarding (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

E-Government Act Compliance

FAS is committed to compliance with the E-Government Act, which requires Government agencies, in general, to provide the public the option of submitting information or transacting business electronically to the maximum extent possible.

Airworthiness Directives; The Cessna Aircraft Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain The Cessna Aircraft Company Model 750 airplanes. This proposed AD was prompted by reports of direct current (DC) generator overvoltage events. This proposed AD would require replacing the auxiliary power unit (APU) generator control unit (GCU). We are proposing this AD to prevent DC generator overvoltage events, which could result in subsequent smoke in the cockpit and loss of avionics and electrical systems.

DATES: We must receive comments on this proposed AD by August 9, 2012.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2012-0644; Directorate Identifier 2012-NM-011-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received reports of direct current (DC) generator overvoltage events. The GCU overvoltage protection circuit can become damaged and allow high voltage to pass through to the airplane systems and electrical components. This condition, if not corrected, could result in smoke in the cockpit and loss of avionics and electrical systems.

Relevant Service Information

We reviewed Cessna Service Bulletin SB750-24-30, dated December 5, 2011. The service information describes procedures for replacing the APU GCU having part number (P/N) 9914752-2 with one having P/N 9914752-6.

Other Relevant Rulemaking

On January 28, 2011, we issued AD 2011-03-16, Amendment 39-16600 (76 FR 8607, February 15, 2011), for Model 750 airplanes. That AD requires an inspection to determine the serial numbers of the APU generator and the left and right engine DC generators, and corrective actions if necessary. That AD also requires revising the airplane flight manual (AFM). That AD was prompted by a report of a DC generator overvoltage event, which caused smoke in the cockpit and damage to numerous avionics and electrical components. In that AD, we noted that additional rulemaking might be necessary. The replacement proposed in this AD is necessary in addition to the actions required by AD 2011-03-16, in order to address the identified unsafe condition.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously, except as discussed under "Differences Between the Proposed AD and the Service Information."

Differences Between the Proposed AD and the Service Information

Operators should note that, although the Accomplishment Instructions of Cessna Service Bulletin SB750-24-30, dated December 5, 2011, state that operators must return the GCU having P/N 9914752-2 to the manufacturer, this proposed AD would not include that requirement.

Operators should also note that, although the Accomplishment Instructions of Cessna Service Bulletin SB750-24-30, dated December 5, 2011, describe procedures for submitting a sheet recording compliance with that service bulletin, this proposed AD would not include that requirement.

Costs of Compliance

We estimate that this proposed AD affects 58 airplanes of U.S. registry.
