

contractors oppose adding this product to the Procurement List. The first contractor is a small business that produces similar items for the Department of Defense (DoD), and stated its sales to DoD have dropped significantly. This contractor believes that the loss of opportunities for small business will result in a reduced supply base for DoD. The second contractor is a small HUBZone certified concern located in an area with high unemployment. This contractor also manufactures similar products, comprising the majority of its sales, for DoD, and subcontracts/purchases supplies from other small business concerns in the area. The firm stated it has a relationship with a local agency that provides services for people with severe disabilities where the contractor subcontracts some work to the agency and has designed, built and donated machinery to the agency. The contractor indicates that it would pursue this opportunity if available through a competitive procurement.

In considering whether to add products or services to the Procurement List, the Committee operates in accordance with applicable statutes and regulations. By regulation, the Committee considers whether the addition is likely to have a severe adverse impact on the current contractor. In this instance, both contractors submitting comments confirm that they are not current contractors, that they only manufacture similar products. The product at issue in this addition is a new product developed with full cooperation of the contracting activity, which demonstrates that the supply base issue was considered. The Committee does not view the loss of the opportunity to bid on new work to constitute severe financial impact, as there is no guarantee that a particular offeror would be successful. Accordingly, it is appropriate that the Committee consider this product for addition to the Procurement List.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.

Dated: July 17, 2012.

Todd A. Stevenson,
Secretary.

Settlement Agreement and Order

1. In accordance with 16 CFR 1118.20, Battat Incorporated ("Battat" or the "Firm") and staff ("Staff") of the United States Consumer Product Safety Commission ("Commission" or "CPSC") hereby enter into this Settlement Agreement ("Agreement") under the Consumer Product Safety Act ("CPSA"). The Agreement and the incorporated attached Order resolve Staff's allegations set forth below.

The Parties

2. Staff is the staff of the Commission, an independent federal regulatory agency established pursuant to, and responsible for, enforcement of the CPSA, 15 U.S.C. 2051-2089.

3. Battat is a privately-held company, organized and existing under the laws of the state of Delaware, with its principal office located at 1560 Military Turnpike, Plattsburgh, New York, 12901.

Staff Allegations

4. Between August 2004 and February 2008, Battat distributed approximately 132,000 Magnabild magnetic building sets ("Subject Products") in U.S. commerce. On January 23, 2008, Battat announced a recall for the Subject Products bearing model numbers BB1431H and BB1502H. On March 13, 2008, Battat announced a recall for the Subject Products bearing model numbers BB1439H and BAT-34. The Subject Products sold for approximately \$20-\$40 through online and nationwide retailers.

5. The Subject Products are "consumer products" and, at all relevant times, Battat was a "distributor" of these consumer products, which were "distribute[d] in commerce," as those terms are defined or used in sections 3(a)(5), (7), and (8) of the CPSA, 15 U.S.C. 2052(a)(5), (7), and (8).

6. The Subject Products, which are labeled for ages three and up, are defective because small, powerful magnets can loosen and fall out of the components with normal use. Magnets found by young children can be swallowed or aspirated. If more than one magnet is swallowed, the magnets can attract each other and cause intestinal perforations or blockages, which can be fatal.

7. Battat received its first complaint of magnets coming loose from the Subject Products in October 2005.

8. By March 31, 2006, Battat had received seven consumer reports of magnet liberation and two consumer reports of children ingesting non-magnetized steel balls. Some consumers described multiple magnet liberations from the Subject Products.

9. On March 31, 2006, the Commission announced the recall of Rose Art Magnetix Building Sets, which involved one death, four serious injuries, and 34 incidents involving small magnets.

10. In April 2006, Battat received two additional consumer complaints of magnet liberation. Battat has represented to the Commission that, "At some point, likely April or May [2006], Battat became aware of the Magnetix recall and only then became aware of the possibility that small magnets could cause intestinal injury."

11. Between November 2006 and July 2007, the Commission re-announced the Rose Art Magnetix Building Sets recall due to additional serious injuries to children; the Commission issued a "Magnet Safety Alert," warning parents of the risk of serious injury and death to children from magnet ingestion; and the Commission announced five separate recalls for several million toys containing magnets due to the potential for magnet liberation.

12. Despite being aware of the danger posed to children by the ingestion of magnets such as those in the Subject Products, and with full awareness that the CPSC and industry were actively working to address the hazards posed to children by the ingestion of magnets, Battat failed to notify the CPSC or inform consumers of the Subject Products' defect and resulting potential hazard.

13. Staff contacted Battat on July 9, 2007, to request a full report pursuant to CPSA section 15(b) ("Section 15 Report"). With this request, Staff enclosed two in-depth investigation reports of consumer reports describing magnets liberating from the Subject Products.

14. Battat did not immediately provide the requested Section 15 Report on the Subject Products. As a result, Staff reiterated its request at least two more times from July 2007 to October 2007. Battat did not file the requested Section 15 Report on the Subject Products until October 12, 2007, after at least three requests from Staff.

15. Battat failed to inform the Commission of the defect and resulting potential hazard present in the Subject Products bearing model numbers
