NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 31, 32, 40, and 70

[NRC–2012–0074]

RIN 3150–AH91

Implementation of Requirements for Distribution of Byproduct Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Interim guidance; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC or the Commission) is amending its regulations to make requirements for distributors of byproduct material clearer, less prescriptive, and more risk-informed and up to date. The rulemaking also redefines some categories of devices to be used under exemption from licensing requirements, adds explicit provisions regarding the sealed source and device registration process, and adds flexibility to the licensing of users of sealed sources and devices. This action was primarily intended to make licensing processes more efficient and effective. These changes will affect manufacturers and distributors of sources and devices containing byproduct material and future users of some products currently used under a general or specific license. The NRC has prepared interim guidance to address implementation of the final regulations. This document announces the availability of the implementation guidance document for public comment.

DATES: Submit comments by September 24, 2012. Comments received after this date will be considered if it is practical to do so, but the NRC is able to assure consideration only for comments received on or before this date.

II. Discussion

The NRC published a proposed rule in the **Federal Register** on June 24, 2010 (75 FR 36212), to amend its regulations

in parts 30, 31, 32, 40 and 70 of Title 10 of the *Code of Federal Regulations* (10 CFR) to make requirements for distributors of byproduct material clearer, less prescriptive, and more risk-informed and up to date. In that notice, the NRC also proposed to redefine categories of devices to be used under exemptions, add explicit provisions regarding the sealed source and device registration process, and add flexibility to the licensing of users of sealed sources and devices. The public comment period on the proposed rule closed on September 7, 2010. The NRC received 10 comments on the proposed rule.

The NRC considered these comments in developing a final rule [RIN 3150-AH91; Docket ID NRC-2008-0338], which is being published in the Rules and Regulations Section of this issue of the **Federal Register**. The final rule will affect manufacturers and distributors of certain products and materials containing source material and certain persons using source material under general license and under exemptions from licensing.

In conjunction with the final rule, the NRC has developed interim guidance. The interim guidance document provides guidance to a licensee or applicant for implementation of 10 CFR parts 30, 31, 32, 40 and 70, "Requirements for Distribution of Byproduct Material." It is intended for use by applicants, licensees, Agreement States, and the NRC staff. The interim guidance describes methods acceptable to the NRC staff for implementing the revised regulations. The approaches and methods described in the guidance document are provided for information and use in implementing the revised regulations. Methods and solutions different from those described in the interim guidance are acceptable if they meet the requirements in 10 CFR parts 30, 31, 32, 40, and 70.

At this time, the NRC is announcing the availability for use of "Interim Guidance for Implementation of the Final Rule, Requirements for Distribution of Byproduct Material in 10 CFR Parts 30, 31, 32, 40, and 70." The document provides guidance on implementing the revised provisions of 10 CFR parts 30, 31, 32, 40, and 70. The NRC is also requesting public comment on this interim guidance. Guidance on the revised regulations will be included in the next revision of the relevant volumes in NUREG-1556, "Consolidated Guidance about Materials Licenses." Comments received on this interim guidance will be considered in the updating of those volumes of NUREG-1556.

Dated at Rockville, Maryland, this 25th day of June 2012.

For the Nuclear Regulatory Commission.

Mark A. Satorius,

Director, Office of Federal and State Materials and Environmental Management Programs.

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede an existing airworthiness directive (AD) that applies to certain Bombardier, Inc. Model DHC-8-400 series airplanes. The existing AD currently requires a modification to trim the edge of the bumper plate, including performing an inspection for damage or cracks of the bumper plate and base fitting, and replacing any damaged or cracked part. That AD also currently requires, for certain airplanes, reidentifying the bumper plate. Since we issued that AD, we have determined that an operational check must be done after reidentifying the bumper plate to ensure the identified unsafe condition is addressed. This proposed AD would require, for airplanes on which the reidentification is done, an operational check of the alternate extension system of the main landing gear (MLG), and repair if necessary. We are proposing this AD to detect and correct failure of the MLG to extend and lock, which could adversely affect the safe landing of the airplane.

DATES: We must receive comments on this proposed AD by September 10, 2012.
