

Atlantic Reports

In the Atlantic region (including the Atlantic coast, Gulf Coast, and U.S. territories in the Caribbean), 52 reports (covering 80 stocks) were updated, including 23 Atlantic reports and 29 Gulf of Mexico reports. Of these, 43 stocks are “strategic” and 37 are “non-strategic.” Information on the remaining Atlantic region stocks can be found in the final 2011 reports (Waring *et al.*, 2011).

Atlantic white-sided dolphins became non-strategic in 2012, due to new abundance estimates. The Northern North Carolina Estuarine System Stock of bottlenose dolphins has a new abundance estimate based on a 2006 mark-recapture survey, resulting in a PBR calculation of 7.9 animals for this stock (previously “undetermined” PBR); the stock remains “strategic.” The Gulf of Mexico Northern Coastal Stock of bottlenose dolphins changed from non-strategic to strategic status with this 2012 report, because an Unusual Mortality Event of unprecedented size and duration (began 1 February 2010 and is ongoing) has impacted the Northern Coastal Stock area.

A new section entitled Habitat Issues has been added to each Gulf of Mexico report, which includes information on the Deepwater Horizon oil spill and the Natural Resource Damage Assessment process.

Pacific Reports

In the Pacific region (waters along the west coast of the United States, within waters surrounding the main and Northwest Hawaiian Islands, and within waters surrounding U.S. Territories in the Western Pacific), SARs were revised for 15 stocks (five “strategic” and ten “non-strategic” stocks). Strategic stocks included: Hawaiian monk seal, Southern Resident killer whale, Hawaii Insular false killer whale, Hawaii Pelagic false killer whale, and California/Oregon/Washington Sperm Whale. Non-strategic stocks included: Long-beaked common dolphin, Eastern North Pacific Gray Whale, Northwestern Hawaiian Islands false killer whale, Palmyra Atoll false killer whale, Hawaii Island spinner dolphin, Oahu/Four Islands spinner dolphin, Kauai/Niihau spinner dolphin, Pearl and Hermes Reef spinner dolphin, Midway Atoll/Kure spinner dolphin, and Hawaii Pelagic spinner dolphin. Information on the remaining Pacific region stocks can be found in the final 2011 reports (Carretta *et al.*, 2012).

The stock assessment report for Palmyra Atoll false killer whale now appears separately from false killer

whale reports that focus on the Hawaiian Islands region, and a new stock of Northwestern Hawaiian Islands false killer whales is presented for the first time. New abundance estimates are available for eight stocks: Hawaiian monk seal, Long-beaked common dolphin, Southern Resident killer whale, three stocks of spinner dolphin (Hawaii Island, Oahu/Four Islands, and Kauai/Niihau), Hawaii Pelagic false killer whale and Northwestern Hawaiian Islands false killer whale. The stock assessment report for Eastern North Pacific gray whales is now included in the Pacific Region stock assessment reports.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on the Service Delivery of the Consumer Financial Protection Bureau.

OMB Control Number: 3170–XXXX.

Abstract: The proposed information collection activity would garner qualitative feedback from financial

institutions, consumers, and stakeholders on a wide range of services the Bureau provides in an efficient, timely manner, in accordance with the Bureau’s commitment to improving service delivery. By qualitative feedback the Bureau means information that provides useful insights on, for example, comprehension, usability, perceptions, and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. The Bureau expects this feedback to include insights into consumer or stakeholder perceptions, experiences, and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the Bureau and consumers, financial institutions, and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from consumers, financial institutions, and stakeholders on the Bureau’s services will be unavailable.

The Bureau will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside of the

Bureau (if released, the agency must indicate the qualitative nature of the information);

- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance would provide useful information, but it would not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Type of Review: New Generic.

Affected Public: Individuals and Households; Businesses, Organizations, and other for-profit, not-for-profit institutions; and State, Local or Tribal Governments.

Average Expected Annual Number of Activities: 25.

Estimated Number of Respondents: 10,000.

Estimated Time per Respondent: 1 Hour per Response.

Frequency of Response: 1 per Year.

Estimated Total Annual Burden Hours: 250,000.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the

request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information shall have practical utility; (b) the accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methodology and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget control number.

Dated: August 1, 2012.
