[NPS-WASO-NRNL-11045; 2200-3200-665]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

Nominations for the following properties being considered for listing or related actions in the National Register were received by the National Park Service before August 4, 2012. Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation. Comments may be forwarded by United States Postal Service, to the National Register of Historic Places, National Park Service, 1849 C St. NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St. NW., 8th floor, Washington, DC 20005; or by fax, 202-371-6447. Written or faxed comments should be submitted by September 17, 2012. Before including your address, phone number, email

address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[INT-FES 12-40]

Final Environmental Impact Statement for the Odessa Subarea Special Study—Columbia Basin Project Adams, Franklin, Grant, and Lincoln Counties, WA

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Reclamation, in cooperation with the Washington State Department of Ecology (Ecology), the joint lead agency, is notifying the public that they have prepared a final environmental impact statement and has made it available to the public for review.

DATES: The Bureau of Reclamation will not make a decision on the proposed action until at least 30 days after filing of the final environment impact statement with the Environmental Protection Agency. After the 30-day waiting period, the Bureau of Reclamation may complete a Record of Decision that identifies a selected action for implementation and discusses the rationale upon which the decision was made.

ADDRESSES: Requests for copies of the final environmental impact statement and comments should be addressed to Candace McKinley, Environmental Program Manager, Bureau of Reclamation, Columbia-Cascades Area Office, 1917 Marsh Road, Yakima, Washington 98901; or by email at odessa@usbr.gov.

FOR FURTHER INFORMATION CONTACT:

Contact Candace McKinley, Environmental Program Manager, Telephone (509) 575-5848 x603. Information on this project can also be found at: http://www.usbr.gov/pn/programs/ucao_misc/odessa/index.html.

SUPPLEMENTARY INFORMATION: The final environmental impact statement (FEIS) was completed pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. 4332, and also will comply with requirements of the Washington State Environmental Policy Act (SEPA), Chapter 43.21C, Revised Code of Washington (RCW). Reclamation published a Notice of Availability for the Draft EIS in the **Federal Register** on October 25, 2010 (75 FR 65503) with an extended public comment period ending on January 31, 2011. Reclamation and Ecology have clarified the FEIS is the initial environmental analysis within a tiered process under NEPA and SEPA. Reclamation and Ecology expect that some projects or actions advanced out of this first tier EIS may be subject to subsequent second tier, project-level, environmental analysis under NEPA and SEPA before being approved for implementation. Tiering refers to the process of addressing a broad, general program, policy or proposal in an initial analysis followed by analyses of a more precisely defined site-specific proposal related to the initial program, policy, or proposal when that proposal is ready to be carried forward. Any subsequent NEPA project-level analysis could include a combination of EIS(s), supplemental EIS(s), environmental assessments(s), and/or categorical exclusion(s) along with corresponding SEPA reviews, as appropriate, depending on the proposed action, phasing of implementation, and potential for adverse impacts. Actions described in this FEIS that are analyzed in full, such as canal expansion will not undergo a second tier NEPA/SEPA review. Decisions relative to the general scope of the action alternative which include acreage, water supply, and general site locations would also not be subject to additional review. The FEIS includes written responses to public comments received on the Draft EIS.

Background Information

The Grand Coulee Dam Project was authorized for construction by the Rivers and Harbors Act of August 30, 1935, and reauthorized and renamed in the Columbia Basin Project Act of March 10, 1943. The Columbia Basin Project (CBP) is a multipurpose water

development project in the central part of the State of Washington. Congress authorized the CBP to irrigate a total of 1,029,000 acres; about 671,000 acres are currently irrigated.

Section 9(a) of the Reclamation Project Act of 1939 gave authority to the Secretary of the Interior (Secretary) to approve a finding of feasibility and thereby authorize construction of a project upon submitting a report to the President and the Congress. The Secretary approved a plan of development for the CBP, known as House Document No. 172 in 1945. House Document No. 172 anticipated that development of the CBP would occur in phases over a 70-year period. The Odessa Subarea Special Study is conducted under the authority of the CBP Act of 1943, as amended, and the Reclamation Project Act of 1939.

In response to the public's concern about declining groundwater supplies in the Odessa aquifer and associated economic and other effects, Congress has funded Reclamation to investigate this problem. Ecology has partnered with Reclamation by providing funding and collaborating on various technical studies. In February 2006, the Washington State Legislature passed the Columbia River Water Resource Management Act (Chapter 90.90 RCW) that directs Ecology to aggressively pursue development of water benefiting both instream and out-of-stream uses through storage, conservation, and voluntary regional water management agreements. The Odessa Subarea Special Study is one of several activities identified in the legislation and was initiated by Reclamation and Ecology in 2008.

Reclamation and Ecology are studying the potential to replace the current and increasingly unreliable groundwater supplies used for irrigation in the Odessa Subarea Special Study Area (Study Area) within the CBP authorized boundary with a surface water supply as part of continued phased development of the CBP.

The alternatives being considered include the No Action Alternative as required by NEPA and SEPA, and six action alternatives that address the Purpose and Need. The six action alternatives rely on several different water supply and delivery options, and fall within the following three categories:

Partial Replacement: This group of delivery alternatives focuses on enlarging the existing East Low Canal and providing CBP surface water to approximately 57,000 acres in the Study Area that currently are irrigated with groundwater. Nearly all of the acreage

served would be south of Interstate 90 (I-90). A small portion of the remaining groundwater-irrigated acres in the Study Area north of I-90, nearest the East Low Canal, may also be served.

Full Replacement: This group of delivery alternatives would provide CBP surface water to most groundwater-irrigated acreage in the Study Area (approximately 102,600 acres), both north and south of I-90. Lands south of I-90 would be served by enlarging the East Low Canal. Lands north of I-90 would be served by constructing a new East High Canal system.

Modified Partial Replacement: This group of delivery alternatives would provide replacement water for approximately 70,000 acres of existing groundwater-irrigated lands both north and south of I-90. Approximately 25,000 acres of 70,000 acres would be located north of I-90, while the remaining 45,000 acres would be south of I-90.

The two modified partial replacement alternatives were developed in response to comments received on the draft EIS. These two alternatives include lands, facilities, and quantities of water that are within the range of alternatives and alternative impacts considered in the Draft EIS.

Two water supply options are being considered that would use storage from Banks Lake reservoir and Lake Roosevelt either individually or in combination, as follows: Option A—Banks Lake reservoir, would use storage through additional drawdowns from Banks Lake reservoir, exclusively; and Option B—Banks Lake and Lake Roosevelt, would use existing storage in Banks Lake and Lake Roosevelt, resulting in additional drawdowns from both reservoirs. Reclamation and Ecology have identified the Modified Partial Replacement Alternative with water supply option A (Banks Only) as their preferred alternative.

The FEIS is available for public inspection at the following locations:

- Bureau of Reclamation, Columbia-Cascades Area Office, 1917 Marsh Road, Yakima, Washington; telephone: (509) 575-5848
- Bureau of Reclamation, Pacific Northwest Regional Office, 1150 North Curtis Road, Suite 100, Boise, Idaho; telephone: (208) 378-5012
- Bureau of Reclamation, Ephrata Field Office, 32 C Street Northwest, Ephrata, Washington; telephone (509) 754-0214
- Washington State Department of Ecology, 15 W. Yakima Avenue, Suite 200, Yakima, Washington; telephone (509) 575-2490

- Washington State Department of Ecology, 4601 North Monroe, Spokane, Washington; telephone (509) 329–3400

BILLING CODE 4310–MN–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 332–534]

Renewable Energy and Related Services: Recent Developments

AGENCY: United States International Trade Commission.

ACTION: Institution of investigation and scheduling of public hearing.

SUMMARY: Following receipt of a request on July 30, 2012 from the U.S. Trade Representative (USTR) under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), the U.S. International Trade Commission (Commission) instituted investigation No. 332–534, *Renewable Energy and Related Services: Recent Developments*.

DATES:

November 15, 2012: Deadline for filing requests to appear at the public hearing.

November 19, 2012: Deadline for filing pre-hearing briefs and statements.
November 29, 2012: Public hearing.

December 17, 2012: Deadline for filing post-hearing briefs and statements.

March 1, 2013: Deadline for filing all other written submissions.

June 28, 2013: Transmittal of Commission report to USTR.

ADDRESSES: All Commission offices, including the Commission's hearing rooms, are located in the United States International Trade Commission Building, 500 E Street SW., Washington, DC. All written submissions should be addressed to the Secretary, United States International Trade Commission, 500 E Street SW., Washington, DC 20436. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov/edis3-internal/app>.

FOR FURTHER INFORMATION CONTACT:

Project Leader Lisa Alejandro (202–205–3486 or Lisa.Alejandro@usitc.gov) or Deputy Project Leader Samantha Brady Pham (202–205–3459 or Samantha.Pham@usitc.gov) for information specific to this investigation. For information on the

legal aspects of this investigation, contact William Gearhart of the Commission's Office of the General Counsel (202–205–3091 or william.gearhart@usitc.gov). The media should contact Margaret O'Laughlin, Office of External Relations (202–205–1819 or margaret.olaughlin@usitc.gov). Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal at 202–205–1810. General information concerning the Commission may also be obtained by accessing its Internet server (<http://www.usitc.gov>). Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

Background: In his letter the USTR requested that the Commission prepare two reports, one on environmental and related services, and a second on renewable energy and related services, and deliver the reports in 8 and 11 months, respectively, after receipt of the letter. This notice announces the institution of an investigation and schedule, including the date for a public hearing, relating to the preparation of the second report, on renewable energy and related services; the Commission published notice of the institution of the first investigation, No. 332–533, *Environmental and Related Services*, in the **Federal Register** of August 21, 2012.

As requested by the USTR, the Commission will provide a report on renewable energy and related services that, to the extent practicable:

- Defines types of renewable energy and related services, identifies leading suppliers, and generally describes the relationship of renewable energy services to the development of renewable energy projects worldwide;
- Estimates the size of the U.S. and global markets for certain renewable energy services, identifies key export and import markets for such services, and describes factors affecting supply and demand;
- Examines U.S. and global renewable energy services trade during 2007–11, and highlights recent trends in investment in renewable energy projects and firms, including new business strategies or practices;
- Identifies barriers to U.S. trade and investment in renewable energy services, and examines recent efforts to liberalize trade in leading markets for such services; and
- Examines the role of clean energy incentive programs in encouraging investment in and creating markets for renewable energy goods and services.
