

for each alternative was assigned one of the following three significance levels:

- **SMALL.** The environmental effects are not detectable or are so minor that they would neither destabilize nor noticeably alter any important attribute of the resource.
- **MODERATE.** The environmental effects are sufficient to noticeably alter, but not destabilize important attributes of the resource.
- **LARGE.** The environmental effects are clearly noticeable and are sufficient to destabilize important attributes of the resource.

The evaluation concludes that the potential environmental impacts of all six alternatives in all resource and impact areas would be SMALL, with the exception of potential impacts on historic and cultural resources from construction of long-term waste storage facilities in Alternatives 3 and 4A, which could be SMALL to MODERATE. Reasons for the mostly SMALL impacts, by resource or impact area, are discussed in the Draft Report.
