

service, operate, or maintain the vending machines.⁶

Various states have established similar programs for persons who are blind to operate vending facilities as a business on state and local government property. Like the Randolph-Sheppard Act program, many of these State programs provide the blind vendor with income from vending machines that are located on the same property but are operated independently of the blind vendor's vending facility business.

The income that blind self-employed vendors receive under the Randolph-Sheppard Act (and similar State programs) from vending machines that are located on the same property, but are not serviced, operated, or maintained by the blind vendor, is not a measure of a blind vendor's own productivity. It does not represent the actual value of any part of the blind vendor's work activity. Since the income a blind vendor receives under this provision of the Randolph-Sheppard Act (or similar State programs) is independent of his or her own vending business, and cannot be attributed to the blind vendor's own work activity, we will not consider this income when we determine whether the self-employment work activity is SGA. We will deduct this income from the blind vendor's net income before we apply the SGA earnings guidelines.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Office of Commercial Space Transportation Safety Approval Performance Criteria

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notification of criteria used to evaluate the National Aerospace Training and Research (NASTAR) Center safety approval application.

SUMMARY: The FAA issued NASTAR a safety approval, subject to the provisions of Title 51 U.S.C. Subtitle V, ch. 509, and the orders, rules and regulations issued under it. Pursuant to Title 14 Code of Federal Regulations (14 CFR) 414.35, this Notice publishes the criteria that were used to evaluate the safety approval application.

Background

NASTAR applied for, and received, a safety approval for the ability of its Falcon 12/4 Altitude Chamber to replicate pressures experienced at altitude levels. The performance criteria for this safety approval are applicant developed per 14 CFR 414.19(a)(4). NASTAR’s Falcon 12/4 Altitude Chamber is capable of replicating any pressure experienced at altitudes from zero (0) feet up to 100,000 feet. This includes rapid decompression up to equalization altitudes of 30,800 feet.

Criteria Used To Evaluate Safety Approval Application

The Falcon 12/4 Altitude Chamber was evaluated by the FAA as a component of a flight crew qualification and training process. The evaluation included the FAA’s assessment of the Falcon 12/4 Altitude Chamber’s ability to accurately replicate the specified pressure levels.

NASTAR submitted the following data to show that the Falcon 12/4
