The prospective exclusive license may be granted unless, within fifteen days from the date of this published Notice, NIST receives written evidence and argument which establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

U.S. Provisional Patent Application No. 61,623/957 is co-owned by the U.S. government, as represented by the Secretary of Commerce, George Mason University, and the University of Maryland. This invention is a chemical sensor architecture that combines the sensitive transduction capability of semiconducting nanostructures together with the enhanced catalytic efficiency of metal and metal-oxide nanoclusters. Nanowire-nanocluster hybrid chemical sensors are realized by functionalizing gallium nitride (GaN) nanowires (NWs) with titanium dioxide (TiO₂) nanoclusters for selectively sensing benzene and other related aromatic compounds. The Hybrid sensor devices are made by fabricating two-terminal devices using individual GaN NWs followed by the deposition of TiO₂ nanoclusters using RF magnetron sputtering. The sensor fabrication process employed standard microfabrication techniques.

SUPPLEMENTARY INFORMATION: NMFS is charged with the recovery of Pacific salmon and steelhead species listed under the Endangered Species Act (ESA). Recovery means that listed species and their ecosystems are restored, and their future secured, so that the protections of the ESA are no longer necessary. The ESA specifies that recovery plans must include: (1) A description of management actions necessary to achieve the plan's goals for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would result in the species being removed from the list; and (3) estimates of time and costs required to achieve the plan's goal and the intermediate steps towards that goal. Section 4(f) of the ESA, as amended in 1988, requires that public notice and an

opportunity for public review and comment be provided during recovery plan development. NMFS is hereby soliciting relevant information on SCCC Steelhead DPS populations and their freshwater/marine habitats. In addition, NMFS is soliciting comment on the contents of the proposed recovery plan.

Persons wishing to review the Public Review Draft Plan can obtain an electronic copy (i.e., CD ROM) from Aimee Fairbanks by calling (562) 980-4013 or by emailing a request to *aimee.fairbanks@noaa.gov* with the subject line "CD ROM Request for SCCC Steelhead Public Review Draft Recovery Plan." ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council's (Council) Groundfish Committee will meet to consider actions affecting New England fisheries in the exclusive economic zone (EEZ).

DATES: The meeting will be held on Monday, November 5, 2012 at 9 a.m.

ADDRESSES: The meeting will be held at the Holiday Inn By the Bay, 88 Spring Street, Portland, ME 04101; telephone: (207) 775-2311; fax: (207) 772-4017.

FOR FURTHER INFORMATION CONTACT: Paul J. Howard, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION: The items of discussion in the committee's agenda are as follows:

The Groundfish Oversight Committee will meet to continue development of Framework Adjustment 48 to the Northeast Multispecies Fishery Management Plan. The Committee will review all options that have been developed and may select preferred alternatives for this action. Measures in the framework include specifications for Fishing Year 2013-15, additional sub-Annual Catch Limits, measures that address monitoring issues for groundfish sectors, changes to accountability measures, recreational fishing measures, and measures that would allow limited access to existing year-round groundfish closed areas. The Committee will also review suggested Council priorities for 2013, and may develop recommendations for those priorities. The Committee will also consider developing possible mitigation measures for the low catch levels expected in Fishing Year 2013, such as recommending the Council pursue measures to increase landings of skates, dogfish, and monkfish. Committee recommendations will be considered by the Council at the November Council meeting. Other business may be discussed.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
