POLICY JUSTIFICATION

Netherlands –AIM–9X–2 SIDEWINDER Missiles

The Government of the Netherlands has requested a possible sale of 28 AIM–9X–2 SIDEWINDER Block II All-Up-Round Missiles, 20 CATM–9X–2 Captive Air Training Missiles, 2 AIM–9X–2 NATM Special Air Training Missiles, 2 CATM–9X–2 Block II Missile Guidance Units, 2 AIM–9X–2 Block II Tactical Guidance Units, 2 Dummy Air Training Missiles, containers, missile support and test equipment, provisioning, spare and repair parts, personnel training and training equipment, publications and technical data, U.S. Government and contractor technical assistance and other related logistics support. The estimated cost is \$60 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve security of a NATO ally which has been, and continues to be, an important force for political stability and economic progress in Northern Europe.

The Royal Netherlands Air Force (RNAF) is modernizing its fighter aircraft to better support the Netherlands' air defense needs. This proposed sale of AIM–9X missiles will improve the RNAF's capability to conduct self defense and regional security missions, and enhance its interoperability with the U.S. and other NATO members. The Netherlands will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of these missiles and related support will not alter the basic military balance in the region.

The prime contractor will be Raytheon Missile Systems Company in Tucson, Arizona. There are no known offset proposed in connection with this potential sale.

Implementation of this proposed sale will require travel of U.S. Government or contractor representatives to the Netherlands on a temporary basis for

program technical support and management oversight.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 12–57

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) Of the Arms Export Control Act

Annex Item No. vii

(vii) *Sensitivity of Technology*:

1. The AIM–9X–2 Block II SIDEWINDER Missile represents a substantial increase in missile acquisition and kinematics performance over the AIM–9M and replaces the AIM–9X Block I Missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe and the ability to integrate the Helmet Mounted Cueing System. The software algorithms are the most sensitive portion of the AIM–9X–2 missile. The software continues to be modified via a pre-planned product improvement (3I) program in order to improve its countermeasure capabilities. No software source code or algorithms will be released. The missile is classified as Confidential.

2. The AIM–9X–2 will result in the transfer of sensitive technology and information. The equipment, hardware, and documentation are classified Confidential. The software and operational performance are classified Secret. The seeker/guidance control section and the target detector are Confidential and contain sensitive state-of-the-art technology. Manuals and technical documentation that are necessary or support operational use and organizational management are classified up to Secret. Performance and operating logic of the counter-countermeasures circuits are classified Secret. The hardware, software, and data identified are classified to protect vulnerabilities, design and performance parameters and similar critical information.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar advanced capabilities.

[Docket No. EF11–4–002]

Western Area Power Administration; Notice of Filing

Take notice that on September 12, 2012, Western Area Power Administration submitted revisions to its Open Access Transmission Tariff to correct formatting and technical errors, to be effective September 13, 2012.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission,
